Apache Kylin
Extreme OLAP Engine for Big Data

Apache Kylin Release Notes

To download latest release, please visit: http://kylin.apache.org/download/ (http://kylin.apache.org/download/), there are source code package, binary package, ODBC driver and installation guide avaliable.

Any problem or issue, please report to Apache Kylin JIRA project: https://issues.apache.org/jira/browse/KYLIN (https://issues.apache.org/jira/browse/KYLIN)

or send to Apache Kylin mailing list:

- User relative: user@kylin.apache.org (mailto:user@kylin.apache.org)
- Development relative: dev@kylin.apache.org (mailto:dev@kylin.apache.org)

v2.0.0 - 2017-04-30

Tag: kylin-2.0.0 (https://github.com/apache/kylin/tree/kylin-2.0.0)
This is a major release with **Spark Cubing**, **Snowflake Data Model** and runs **TPC-H Benchmark**. Check out the download (/download/) and the how to upgrade guide (/docs20/howto/howto_upgrade.html).

New Feature

- [KYLIN-744] - Spark Cube Build Engine
- [KYLIN-2006] - Make job engine distributed and HA
- [KYLIN-2031] - New Fix_length_Hex encoding to support hash value and better Integer encoding to support negative value
- [KYLIN-2180] - Add project config and make config priority become "cube > project > server"
- [KYLIN-2240] - Add a toggle to ignore all cube signature inconsistency temporally
- [KYLIN-2317] - Hybrid Cube CLI Tools
- [KYLIN-2331] - By layer Spark cubing
- [KYLIN-2351] - Support Cloud DFS as kylin.env.hdfs-working-dir
- [KYLIN-2388] - Hot load kylin config from web
- [KYLIN-2394] - Upgrade Calcite to 1.11 and Avatica to 1.9
- [KYLIN-2396] - Percentile pre-aggregation implementation

Improvements

- [KYLIN-227] - Support "Pause" on Kylin Job
- [KYLIN-490] - Support multiple column distinct count
- [KYLIN-995] - Enable kylin to support joining the same lookup table more than once
- [KYLIN-1832] - HyperLogLog codec performance improvement
- [KYLIN-1875] - Snowflake schema support
- [KYLIN-1971] - Cannot support columns with same name under different table
- [KYLIN-2029] - lookup table support count(distinct column)
- [KYLIN-2030] - lookup table support group by primary key when no derived dimension
- [KYLIN-2096] - Support "select version()" SQL statement
- [KYLIN-2131] - Load Kafka client configuration from properties files
- [KYLIN-2133] - Check web server port availability when startup

- [KYLIN-2135] - Enlarge FactDistinctColumns reducer number
- [KYLIN-2136] - Enhance cubing algorithm selection
- [KYLIN-2141] - Add include/exclude interface for ResourceTool
- [KYLIN-2144] - move useful operation tools to org.apache.kylin.tool
- [KYLIN-2163] - Refine kylin scripts, less verbose during start up
- [KYLIN-2165] - Use hive table statistics data to get the total count
- [KYLIN-2169] - Refactor AbstractExecutable to respect KylinConfig
- [KYLIN-2170] - Mapper/Reducer cleanup() exception handling
- [KYLIN-2175] - cubestatsreader support reading unfinished segments
- [KYLIN-2181] - remove integer as fixed_length in test_kylin_cube_with_slr_empty desc
- [KYLIN-2187] - Enhance TableExt metadata
- [KYLIN-2192] - More Robust Global Dictionary
- [KYLIN-2193] - parameterise org.apache.kylin.storage.translate.DerivedFilterTranslator#IN_THRESHOLD
- [KYLIN-2195] - Setup naming convention for kylin properties
- [KYLIN-2196] - Update Tomcat clas loader to parallel loader
- [KYLIN-2198] - Add a framework to allow major changes in DimensionEncoding
- [KYLIN-2205] - Use column name as the default dimension name
- [KYLIN-2215] - Refactor DimensionEncoding.encode(byte[]) to encode(String)
- [KYLIN-2217] - Reducers build dictionaries locally
- [KYLIN-2220] - Enforce same name between Cube & CubeDesc
- [KYLIN-2222] - web ui uses rest api to decide which dim encoding is valid for different typed columns
- [KYLIN-2227] - rename kylin-log4j.properties to kylin-tools-log4j.properties and move it to global conf folder
- [KYLIN-2238] - Add query server scan threshold
- [KYLIN-2244] - "kylin.job.cuboid.size.memhungry.ratio" shouldn't be applied on measures like TopN
- [KYLIN-2246] - redesign the way to decide layer cubing reducer count
- [KYLIN-2248] - TopN merge further optimization after KYLIN-1917
- [KYLIN-2252] - Enhance project/model/cube name check
- [KYLIN-2255] - Drop v1 CubeStorageQuery, Storage Engine ID=0
- [KYLIN-2263] - Display reasonable exception message if could not find kafka dependency for streaming build
- [KYLIN-2266] - Reduce memory usage for building global dict
- [KYLIN-2269] - Reduce MR memory usage for global dict
- [KYLIN-2280] - A easier way to change all the conflict ports when start multi kylin instance in the same server
- [KYLIN-2283] - Have a general purpose data generation tool
- [KYLIN-2287] - Speed up model and cube list load in Web
- [KYLIN-2290] - minor improvements on limit
- [KYLIN-2294] - Refactor CI, merge with_slr and without_slr cubes
- [KYLIN-2295] - Refactor CI, blend view cubes into the rest
- [KYLIN-2296] - Allow cube to override kafka configuration
- [KYLIN-2304] - Only copy latest version dict for global dict
- [KYLIN-2306] - Tolerate Class missing when loading job list
- [KYLIN-2307] - Make HBase 1.x the default of master
- [KYLIN-2308] - Allow user to set more columnFamily in web
- [KYLIN-2310] - Refactor CI, add IT for date/time encoding & extended column
- [KYLIN-2312] - Display Server Config/Environment by order in system tab
- [KYLIN-2314] - Add Integration Test (IT) for snowflake
- [KYLIN-2323] - Refine Table load/unload error message
- [KYLIN-2328] - Reduce the size of metadata uploaded to distributed cache
- [KYLIN-2338] - refactor BitmapCounter.DataInputByteBuffer
- [KYLIN-2349] - Serialize BitmapCounter with peekLength
- [KYLIN-2353] - Serialize BitmapCounter with distinct count
- [KYLIN-2358] - CuboidReducer has too many "if (aggrMask[i])" checks
- [KYLIN-2359] - Update job build step name
- [KYLIN-2364] - Output table name to error info in LookupTable
- [KYLIN-2375] - Default cache size (10M) is too small
- [KYLIN-2377] - Add kylin client query timeout
- [KYLIN-2378] - Set job thread name with job uuid
- [KYLIN-2379] - Add UseCMSInitiatingOccupancyOnly to KYLIN_JVM_SETTINGS

- [KYLIN-2380] - Refactor DbUnit assertions
- [KYLIN-2387] - A new BitmapCounter with better performance
- [KYLIN-2389] - Improve resource utilization for DistributedScheduler
- [KYLIN-2393] - Add "hive.auto.convert.join" and "hive.stats.autogather" to kylin_hive_conf.xml
- [KYLIN-2400] - Simplify Dictionary interface
- [KYLIN-2404] - Add "hive.merge.mapfiles" and "hive.merge.mapredfiles" to kylin_hive_conf.xml
- [KYLIN-2409] - Performance tunning for in-mem cubing
- [KYLIN-2411] - Kill MR job on pause
- [KYLIN-2414] - Distinguish UHC columns from normal columns in KYLIN-2217
- [KYLIN-2415] - Change back default metadata name to "kylin_metadata"
- [KYLIN-2418] - Refactor pom.xml, drop unused parameter
- [KYLIN-2422] - NumberDictionary support for decimal with extra 0 after "."
- [KYLIN-2423] - Model should always include PK/FK as dimensions
- [KYLIN-2424] - Optimize the integration test's performance
- [KYLIN-2428] - Cleanup unnecessary shaded libraries for job/coprocessor/jdbc/server
- [KYLIN-2436] - add a configuration knob to disable spilling of aggregation cache
- [KYLIN-2437] - collect number of bytes scanned to query metrics
- [KYLIN-2438] - replace scan threshold with max scan bytes
- [KYLIN-2442] - Re-calculate expansion rate, count raw data size regardless of flat table compression
- [KYLIN-2443] - Report coprocessor error information back to client
- [KYLIN-2446] - Support project names filter in DeployCoprocessorCLI
- [KYLIN-2451] - Set HBASE_RPC_TIMEOUT according to kylin.storage.hbase.coprocessor-timeout-seconds
- [KYLIN-2489] - Upgrade zookeeper dependency to 3.4.8
- [KYLIN-2494] - Model has no dup column on dimensions and measures
- [KYLIN-2501] - Stream Aggregate GTRecords at Query Server
- [KYLIN-2503] - Spark cubing step should show YARN app link
- [KYLIN-2518] - Improve the sampling performance of FactDistinctColumns step
- [KYLIN-2525] - Smooth upgrade to 2.0.0 from older metadata
- [KYLIN-2527] - Speedup LookupStringTable, use HashMap instead of ConcurrentHashMap
- [KYLIN-2528] - refine job email notification to support starttls and customized port
- [KYLIN-2529] - Allow thread-local override of KylinConfig
- [KYLIN-2545] - Number2BytesConverter could tolerate malformed numbers
- [KYLIN-2560] - Fix license headers for 2.0.0 release

Bugs

- [KYLIN-1603] - Building job still finished even MR job error happened.
- [KYLIN-1770] - Upgrade Calcite dependency (v1.10)
- [KYLIN-1793] - Job couldn't stop when hive commands got error with beeline
- [KYLIN-1945] - Cuboid.translateToValidCuboid method throw exception while cube building or query execute
- [KYLIN-2077] - Inconsistent cube desc signature for CubeDesc
- [KYLIN-2153] - Allow user to skip the check in CubeMetaIngester
- [KYLIN-2155] - get-properties.sh doesn't support parameters starting with "-n"
- [KYLIN-2166] - Unclosed HBaseAdmin in StorageCleanupJob#cleanUnusedHBaseTables
- [KYLIN-2172] - Potential NPE in ExecutableManager#updateJobOutput
- [KYLIN-2174] - partitoin column format visibility issue
- [KYLIN-2176] - org.apache.kylin.rest.service.JobService#submitJob will leave orphan NEW segment in cube when exception is met
- [KYLIN-2191] - Integer encoding error for width from 5 to 7
- [KYLIN-2197] - Has only base cuboid for some cube desc
- [KYLIN-2202] - Fix the conflict between KYLIN-1851 and KYLIN-2135
- [KYLIN-2207] - Ineffective null check in ExtendCubeToHybridCLI#createFromCube()
- [KYLIN-2208] - Unclosed FileReader in HiveCmdBuilder#build()
- [KYLIN-2209] - Potential NPE in StreamingController#deserializeTableDesc()
- [KYLIN-2211] - IDictionaryValueEnumerator should return String instead of byte[]
- [KYLIN-2212] - 'NOT' operator in filter on derived column may get incorrect result
- [KYLIN-2213] - UnsupportedOperationException when excute 'not like' query on cube v1
- [KYLIN-2216] - Potential NPE in model#findTable() call
- [KYLIN-2224] - "select * from fact inner join lookup " does not return values for look up columns

- [KYLIN-2232] - cannot set partition date column pattern when edit a model
- [KYLIN-2236] - JDBC statement.setMaxRows(10) is not working
- [KYLIN-2237] - Ensure dimensions and measures of model don't have null column
- [KYLIN-2242] - Directly write hdfs file in reducer is dangerous
- [KYLIN-2243] - TopN memory estimation is inaccurate in some cases
- [KYLIN-2251] - JDBC Driver httpcore dependency conflict
- [KYLIN-2254] - A kind of sub-query does not work
- [KYLIN-2262] - Get "null" error when trigger a build with wrong cube name
- [KYLIN-2268] - Potential NPE in ModelDimensionDesc#init()
- [KYLIN-2271] - Purge cube may delete building segments
- [KYLIN-2275] - Remove dimensions cause wrong remove in advance settings
- [KYLIN-2277] - SELECT * query returns a "COUNT__" column, which is not expected
- [KYLIN-2282] - Step name "Build N-Dimension Cuboid Data : N-Dimension" is inaccurate
- [KYLIN-2284] - intersect_count function error
- [KYLIN-2288] - Kylin treat empty string as error measure which is inconsistent with hive
- [KYLIN-2292] - workaround for CALCITE-1540
- [KYLIN-2297] - Manually edit cube segment start/end time will throw error in UI
- [KYLIN-2298] - timer component get wrong seconds
- [KYLIN-2300] - Show MapReduce waiting time for each build step
- [KYLIN-2301] - ERROR when executing query with subquery in "NOT IN" clause.
- [KYLIN-2305] - Unable to use long searchBase/Pattern for LDAP
- [KYLIN-2313] - Cannot find a cube in a subquery case with count distinct
- [KYLIN-2316] - Build Base Cuboid Data ERROR
- [KYLIN-2320] - TrieDictionaryForest incorrect getSizeOfId() when empty dictionary
- [KYLIN-2326] - ERROR: ArrayIndexOutOfBoundsException: -1
- [KYLIN-2329] - Between 0.06 - 0.01 and 0.06 + 0.01, returns incorrect result
- [KYLIN-2330] - CubeDesc returns redundant DerivedInfo
- [KYLIN-2337] - Remove expensive toString in SortedIteratorMergerWithLimit
- [KYLIN-2340] - Some subquery returns incorrect result
- [KYLIN-2341] - sum(case .. when ..) is not supported
- [KYLIN-2342] - When NoClassDefFoundError occurred in building cube, no error in kylin.log
- [KYLIN-2343] - When syn hive table, got error but actually the table is synced
- [KYLIN-2347] - TPC-H query 13, too many HLLC objects exceed memory budget
- [KYLIN-2348] - TPC-H query 20, requires multiple models in one query
- [KYLIN-2356] - Incorrect result when filter on numeric columns
- [KYLIN-2357] - Make ERROR_RECORD_LOG_THRESHOLD configurable
- [KYLIN-2362] - Unify shell interpreter in scripts to avoid syntax diversity
- [KYLIN-2367] - raw query like select * where ... returns empty columns
- [KYLIN-2376] - Upgrade checkstyle plugin
- [KYLIN-2382] - The column order of "select *" is not as defined in the table
- [KYLIN-2383] - count distinct should not include NULL
- [KYLIN-2390] - Wrong argument order for WinAggResetContextImpl()
- [KYLIN-2391] - Unclosed FileInputStream in KylinConfig#getConfigAsString()
- [KYLIN-2395] - Lots of warning messages about failing to scan jars in kylin.out
- [KYLIN-2406] - TPC-H query 20, prevent NPE and give error hint
- [KYLIN-2407] - TPC-H query 20, routing bug in lookup query and cube query
- [KYLIN-2410] - Global dictionary does not respect the Hadoop configuration in mapper & reducer
- [KYLIN-2416] - Max LDAP password length is 15 chars
- [KYLIN-2419] - Rollback KYLIN-2292 workaround
- [KYLIN-2426] - Tests will fail if env not satisfy hardcoded path in ITHDFSResourceStoreTest
- [KYLIN-2429] - Variable initialized should be declared volatile in SparkCubingByLayer#execute()
- [KYLIN-2430] - Unnecessary exception catching in BulkLoadJob
- [KYLIN-2432] - Couldn't select partition column in some old browser (such as Google Chrome 18.0.1025.162)
- [KYLIN-2433] - Handle the column that all records is null in MergeCuboidMapper
- [KYLIN-2434] - Spark cubing does not respect config kylin.source.hive.database-for-flat-table
- [KYLIN-2440] - Query failed if join condition columns not appear on cube
- [KYLIN-2448] - Cloning a Model with a '-' in the name

- [KYLIN-2449] - Rewrite should not run on OLAPAggregateRel if has no OLAPTable
- [KYLIN-2452] - Throw NoSuchElementException when AggregationGroup size is 0
- [KYLIN-2454] - Data generation tool will fail if column name is hive reserved keyword
- [KYLIN-2457] - Should copy the latest dictionaries on dimension tables in a batch merge job
- [KYLIN-2462] - PK and FK both as dimensions causes save cube failure
- [KYLIN-2464] - Use ConcurrentMap instead of ConcurrentHashMap to avoid runtime errors
- [KYLIN-2465] - Web page still has "Streaming cube build is not supported on UI" statements
- [KYLIN-2474] - Build snapshot should check lookup PK uniqueness
- [KYLIN-2481] - NoRealizationFoundException when there are similar cubes and models
- [KYLIN-2487] - IN condition will convert to subquery join when its elements number exceeds 20
- [KYLIN-2490] - Couldn't get cube size on Azure HDInsight
- [KYLIN-2491] - Cube with error job can be dropped
- [KYLIN-2502] - "Create flat table" and "redistribute table" steps don't show YARN application link
- [KYLIN-2504] - Clone cube didn't keep the "engine_type" property
- [KYLIN-2508] - Trans the time to UTC time when set the range of building cube
- [KYLIN-2510] - Unintended NPE in CubeMetaExtractor#requireProject()
- [KYLIN-2514] - Joins in data model fail to save when they disorder
- [KYLIN-2516] - a table field can not be used as both dimension and measure in kylin 2.0
- [KYLIN-2530] - Build cube failed with NoSuchObjectException, hive table not found 'default.kylin_intermediate_xxxx'
- [KYLIN-2536] - Replace the use of org.codehaus.jackson
- [KYLIN-2537] - HBase Read/Write separation bug introduced by KYLIN-2351
- [KYLIN-2539] - Useless filter dimension will impact cuboid selection.
- [KYLIN-2541] - Beeline SQL not printed in logs
- [KYLIN-2543] - Still build dictionary for TopN group by column even using non-dict encoding
- [KYLIN-2555] - minor issues about acl and granted autority

Tasks

- [KYLIN-1799] - Add a document to setup kylin on spark engine?
- [KYLIN-2293] - Refactor KylinConfig to remove test related code
- [KYLIN-2327] - Enable check-style for test code
- [KYLIN-2344] - Package spark into Kylin binary package
- [KYLIN-2368] - Enable Findbugs plugin
- [KYLIN-2386] - Revert KYLIN-2349 and KYLIN-2353
- [KYLIN-2521] - upgrade to calcite 1.12.0

v1.6.0 - 2016-11-26

Tag: kylin-1.6.0 (https://github.com/apache/kylin/tree/kylin-1.6.0)
This is a major release with better support for using Apache Kafka as data source. Check how to upgrade
(/docs16/howto/howto_upgrade.html) to do the upgrading.

New Feature

- [KYLIN-1726] - Scalable streaming cubing
- [KYLIN-1919] - Support Embedded Structure when Parsing Streaming Message
- [KYLIN-2055] - Add an encoder for Boolean type
- [KYLIN-2067] - Add API to check and fill segment holes
- [KYLIN-2079] - add explicit configuration knob for coprocessor timeout
- [KYLIN-2088] - Support intersect count for calculation of retention or conversion rates
- [KYLIN-2125] - Support using beeline to load hive table metadata

Bug

- [KYLIN-1565] - Read the kv max size from HBase config
- [KYLIN-1820] - Column autocomplete should remove the user input in model designer
- [KYLIN-1828] - java.lang.StringIndexOutOfBoundsException in org.apache.kylin.storage.hbase.util.StorageCleanupJob
- [KYLIN-1967] - Dictionary rounding can cause IllegalArgumentException in GTScanRangePlanner
- [KYLIN-1978] - kylin.sh compatible issue on Ubuntu
- [KYLIN-1990] - The SweetAlert at the front page may out of the page if the content is too long.

- [KYLIN-2007] - CUBOID_CACHE is not cleared when rebuilding ALL cache
- [KYLIN-2012] - more robust approach to hive schema changes
- [KYLIN-2024] - kylin TopN only support the first measure
- [KYLIN-2027] - Error "connection timed out" occurs when zookeeper's port is set in hbase.zookeeper.quorum of hbase-site.xml
- [KYLIN-2028] - find-*-dependency script fail on Mac OS
- [KYLIN-2035] - Auto Merge Submit Continuously
- [KYLIN-2041] - Wrong parameter definition in Get Hive Tables REST API
- [KYLIN-2043] - Rollback httpclient to 4.2.5 to align with Hadoop 2.6/2.7
- [KYLIN-2044] - Unclosed DataInputByteBuffer in BitmapCounter#peekLength
- [KYLIN-2045] - Wrong argument order in JobInstanceExtractor#executeExtract()
- [KYLIN-2047] - Ineffective null check in MetadataManager
- [KYLIN-2050] - Potentially ineffective call to close() in QueryCli
- [KYLIN-2051] - Potentially ineffective call to IOUtils.closeQuietly()
- [KYLIN-2052] - Edit "Top N" measure, the "group by" column wasn't displayed
- [KYLIN-2059] - Concurrent build issue in CubeManager.calculateToBeSegments()
- [KYLIN-2069] - NPE in LookupStringTable
- [KYLIN-2078] - Can't see generated SQL at Web UI
- [KYLIN-2084] - Unload sample table failed
- [KYLIN-2085] - PrepareStatement return incorrect result in some cases
- [KYLIN-2086] - Still report error when there is more than 12 dimensions in one agg group
- [KYLIN-2093] - Clear cache in CubeMetaIngester
- [KYLIN-2097] - Get 'Column does not exist in row key desc" on cube has TopN measure
- [KYLIN-2099] - Import table error of sample table KYLIN_CAL_DT
- [KYLIN-2106] - UI bug - Advanced Settings - Rowkeys - new Integer dictionary encoding - could possibly impact also cube metadata
- [KYLIN-2109] - Deploy coprocessor only this server own the table
- [KYLIN-2110] - Ineffective comparison in BooleanDimEnc#equals()
- [KYLIN-2114] - WEB-Global-Dictionary bug fix and improve
- [KYLIN-2115] - some extended column query returns wrong answer
- [KYLIN-2116] - when hive field delimitor exists in table field values, fields order is wrong
- [KYLIN-2119] - Wrong chart value and sort when process scientific notation
- [KYLIN-2120] - kylin1.5.4.1 with cdh5.7 cube sql Oops Faild to take action
- [KYLIN-2121] - Failed to pull data to PowerBI or Excel on some query
- [KYLIN-2127] - UI bug fix for Extend Column
- [KYLIN-2130] - QueryMetrics concurrent bug fix
- [KYLIN-2132] - Unable to pull data from Kylin Cube (learn_kylin cube) to Excel or Power BI for Visualization and some dimensions are not showing up.
- [KYLIN-2134] - Kylin will treat empty string as NULL by mistake
- [KYLIN-2137] - Failed to run mr job when user put a kafka jar in hive's lib folder
- [KYLIN-2138] - Unclosed ResultSet in BeelineHiveClient
- [KYLIN-2146] - "Streaming Cluster" page should remove "Margin" inputbox
- [KYLIN-2152] - TopN group by column does not distinguish between NULL and ""
- [KYLIN-2154] - source table rows will be skipped if TOPN's group column contains NULL values
- [KYLIN-2158] - Delete joint dimension not right
- [KYLIN-2159] - Redistribution Hive Table Step always requires row_count filename as 000000_0
- [KYLIN-2167] - FactDistinctColumnsReducer may get wrong max/min partition col value
- [KYLIN-2173] - push down limit leads to wrong answer when filter is loosened
- [KYLIN-2178] - CubeDescTest is unstable
- [KYLIN-2201] - Cube desc and aggregation group rule combination max check fail
- [KYLIN-2226] - Build Dimension Dictionary Error

Improvement

- [KYLIN-1042] - Horizontal scalable solution for streaming cubing
- [KYLIN-1827] - Send mail notification when runtime exception throws during build/merge cube
- [KYLIN-1839] - improvement set classpath before submitting mr job
- [KYLIN-1917] - TopN counter merge performance improvement
- [KYLIN-1962] - Split kylin.properties into two files
- [KYLIN-1999] - Use some compression at UT/IT

- [KYLIN-2019] - Add license checker into checkstyle rule
- [KYLIN-2033] - Refactor broadcast of metadata change
- [KYLIN-2042] - QueryController puts entry in Cache w/o checking QueryCacheEnabled
- [KYLIN-2054] - TimedJsonStreamParser should support other time format
- [KYLIN-2068] - Import hive comment when sync tables
- [KYLIN-2070] - UI changes for allowing concurrent build/refresh/merge
- [KYLIN-2073] - Need timestamp info for diagnose
-
  [KYLIN-2075] - TopN measure: need select "constant" + "1" as the SUM ORDER parameter
- [KYLIN-2076] - Improve sample cube and data
- [KYLIN-2080] - UI: allow multiple building jobs for the same cube
- [KYLIN-2082] - Support to change streaming configuration
- [KYLIN-2089] - Make update HBase coprocessor concurrent
- [KYLIN-2090] - Allow updating cube level config even the cube is ready
- [KYLIN-2091] - Add API to init the start-point (of each parition) for streaming cube
- [KYLIN-2095] - Hive mr job use overrided MR job configuration by cube properties
- [KYLIN-2098] - TopN support query UHC column without sorting by sum value
- [KYLIN-2100] - Allow cube to override HIVE job configuration by properties
- [KYLIN-2108] - Support usage of schema name "default" in SQL
- [KYLIN-2111] - only allow columns from Model dimensions when add group by column to TOP_N
- [KYLIN-2112] - Allow a column be a dimension as well as "group by" column in TopN measure
- [KYLIN-2113] - Need sort by columns in SQLDigest
- [KYLIN-2118] - allow user view CubeInstance json even cube is ready
- [KYLIN-2122] - Move the partition offset calculation before submitting job
- [KYLIN-2126] - use column name as default dimension name when auto generate dimension for lookup table
- [KYLIN-2140] - rename packaged js with different name when build
- [KYLIN-2143] - allow more options from Extended Columns,COUNT_DISTINCT,RAW_TABLE
- [KYLIN-2162] - Improve the cube validation error message
- [KYLIN-2221] - rethink on KYLIN-1684
- [KYLIN-2083] - more RAM estimation test for MeasureAggregator and GTAggregateScanner
- [KYLIN-2105] - add QueryId
- [KYLIN-1321] - Add derived checkbox for lookup table columns on Auto Generate Dimensions panel
- [KYLIN-1995] - Upgrade MapReduce properties which are deprecated

Task

- [KYLIN-2072] - Cleanup old streaming code
- [KYLIN-2081] - UI change to support embeded streaming message
- [KYLIN-2171] - Release 1.6.0

v1.5.4.1 - 2016-09-28

Tag: kylin-1.5.4.1 (https://github.com/apache/kylin/tree/kylin-1.5.4.1)
This version fixes two major bugs introduced in 1.5.4; The metadata and HBase coprocessor is compatible with 1.5.4.

Bug

- [KYLIN-2010] - Date dictionary return wrong SQL result
- [KYLIN-2026] - NPE occurs when build a cube without partition column
- [KYLIN-2032] - Cube build failed when partition column isn't in dimension list

v1.5.4 - 2016-09-15

Tag: kylin-1.5.4 (https://github.com/apache/kylin/tree/kylin-1.5.4)
This version includes bug fixs/enhancements as well as new features; It is backward compatiple with v1.5.3; While after upgrade, you still need update coprocessor, refer to How to update coprocessor (/docs15/howto/howto_update_coprocessor.html).

New Feature

- [KYLIN-1732] - Support Window Function
- [KYLIN-1767] - UI for TopN: specify encoding and multiple "group by"

- [KYLIN-1849] - Search cube by name in Web UI
- [KYLIN-1908] - Collect Metrics to JMX
- [KYLIN-1921] - Support Grouping Funtions
- [KYLIN-1964] - Add a companion tool of CubeMetaExtractor for cube importing

Bug

- [KYLIN-962] - [UI] Cube Designer can't drag rowkey normally
- [KYLIN-1194] - Filter(CubeName) on Jobs/Monitor page works only once
- [KYLIN-1488] - When modifying a model, Save after deleting a lookup table. The internal error will pop up.
- [KYLIN-1760] - Save query hits org.apache.hadoop.hbase.TableNotFoundException: kylin_metadata_user
- [KYLIN-1808] - unload non existing table cause NPE
- [KYLIN-1834] - java.lang.IllegalArgumentException: Value not exists! - in Step 4 - Build Dimension Dictionary
- [KYLIN-1883] - Consensus Problem when running the tool, MetadataCleanupJob
- [KYLIN-1889] - Didn't deal with the failure of renaming folder in hdfs when running the tool CubeMigrationCLI
- [KYLIN-1929] - Error to load slow query in "Monitor" page for non-admin user
- [KYLIN-1933] - Deploy in cluster mode, the "query" node report "scheduler has not been started" every second
- [KYLIN-1934] - 'Value not exist' During Cube Merging Caused by Empty Dict
- [KYLIN-1939] - Linkage error while executing any queries
- [KYLIN-1942] - Models are missing after change project's name
- [KYLIN-1953] - Error handling for diagnosis
- [KYLIN-1956] - Can't query from child cube of a hybrid cube after its status changed from disabled to enabled
- [KYLIN-1961] - Project name is always constant instead of real project name in email notification
- [KYLIN-1970] - System Menu UI ACL issue
- [KYLIN-1972] - Access denied when query seek to hybrid
- [KYLIN-1973] - java.lang.NegativeArraySizeException when Build Dimension Dictionary
- [KYLIN-1982] - CubeMigrationCLI: associate model with project
- [KYLIN-1986] - CubeMigrationCLI: make global dictionary unique
- [KYLIN-1992] - Clear ThreadLocal Contexts when query failed before scaning HBase
- [KYLIN-1996] - Keep original column order when designing cube
- [KYLIN-1998] - Job engine lock is not release at shutdown
- [KYLIN-2003] - error start time at query result page
- [KYLIN-2005] - Move all storage side behavior hints to GTScanRequest

Improvement

- [KYLIN-672] - Add Env and Project Info in job email notification
- [KYLIN-1702] - The Key of the Snapshot to the related lookup table may be not informative
- [KYLIN-1855] - Should exclude those joins in whose related lookup tables no dimensions are used in cube
- [KYLIN-1858] - Remove all InvertedIndex(Streaming purpose) related codes and tests
- [KYLIN-1866] - Add tip for field at 'Add Streaming' table page.
- [KYLIN-1867] - Upgrade dependency libraries
- [KYLIN-1874] - Make roaring bitmap version determined
- [KYLIN-1898] - Upgrade to Avatica 1.8 or higher
- [KYLIN-1904] - WebUI for GlobalDictionary
- [KYLIN-1906] - Add more comments and default value for kylin.properties
- [KYLIN-1910] - Support Separate HBase Cluster with NN HA and Kerberos Authentication
- [KYLIN-1920] - Add view CubeInstance json function
- [KYLIN-1922] - Improve the logic to decide whether to pre aggregate on Region server
- [KYLIN-1923] - Add access controller to query
- [KYLIN-1924] - Region server metrics: replace int type for long type for scanned row count
- [KYLIN-1925] - Do not allow cross project clone for cube
- [KYLIN-1926] - Loosen the constraint on FK-PK data type matching
- [KYLIN-1936] - Improve enable limit logic (exactAggregation is too strict)
- [KYLIN-1940] - Add owner for DataModel
- [KYLIN-1941] - Show submitter for slow query
- [KYLIN-1954] - BuildInFunctionTransformer should be executed per CubeSegmentScanner
- [KYLIN-1963] - Delegate the loading of certain package (like slf4j) to tomcat's parent classloader
- [KYLIN-1965] - Check duplicated measure name

- [KYLIN-1966] - Refactor IJoinedFlatTableDesc
- [KYLIN-1979] - Move hackNoGroupByAggregation to cube-based storage implementations
- [KYLIN-1984] - Don't use compression in packaging configuration
- [KYLIN-1985] - SnapshotTable should only keep the columns described in tableDesc
- [KYLIN-1997] - Add pivot feature back in query result page
- [KYLIN-2004] - Make the creating intermediate hive table steps configurable (two options)

v1.5.3 - 2016-07-28

Tag: kylin-1.5.3 (https://github.com/apache/kylin/tree/kylin-1.5.3)
This version includes many bug fixs/enhancements as well as new features; It is backward compatiple with v1.5.2; But after upgrade, you need to update coprocessor, refer to How to update coprocessor (/docs15/howto/howto_update_coprocessor.html).

New Feature

- [KYLIN-1478] - TopN measure should support non-dictionary encoding for ultra high cardinality
- [KYLIN-1693] - Support multiple group-by columns for TOP_N meausre
- [KYLIN-1752] - Add an option to fail cube build job when source table is empty
- [KYLIN-1756] - Allow user to run MR jobs against different Hadoop queues

Bug

- [KYLIN-1499] - Couldn't save query, error in backend
- [KYLIN-1568] - Calculate row value buffer size instead of hard coded ROWVALUE_BUFFER_SIZE
- [KYLIN-1645] - Exception inside coprocessor should report back to the query thread
- [KYLIN-1646] - Column appeared twice if it was declared as both dimension and measure
- [KYLIN-1676] - High CPU in TrieDictionary due to incorrect use of HashMap
- [KYLIN-1679] - bin/get-properties.sh cannot get property which contains space or equals sign
- [KYLIN-1684] - query on table "kylin_sales" return empty resultset after cube "kylin_sales_cube" which generated by sample.sh is ready
- [KYLIN-1694] - make multiply coefficient configurable when estimating cuboid size
- [KYLIN-1695] - Skip cardinality calculation job when loading hive table
- [KYLIN-1703] - The not-thread-safe ToolRunner.run() will cause concurrency issue in job engine
- [KYLIN-1704] - When load empty snapshot, NULL Pointer Exception occurs
- [KYLIN-1723] - GTAggregateScanner$Dump.flush() must not write the WHOLE metrics buffer
- [KYLIN-1738] - MRJob Id is not saved to kylin jobs if MR job is killed
- [KYLIN-1742] - kylin.sh should always set KYLIN_HOME to an absolute path
- [KYLIN-1755] - TopN Measure IndexOutOfBoundsException
- [KYLIN-1760] - Save query hits org.apache.hadoop.hbase.TableNotFoundException: kylin_metadata_user
- [KYLIN-1762] - Query threw NPE with 3 or more join conditions
- [KYLIN-1769] - There is no response when click "Property" button at Cube Designer
- [KYLIN-1777] - Streaming cube build shouldn't check working segment
- [KYLIN-1780] - Potential issue in SnapshotTable.equals()
- [KYLIN-1781] - kylin.properties encoding error while contain chinese prop key or value
- [KYLIN-1783] - Can't add override property at cube design 'Configuration Overwrites' step.
- [KYLIN-1785] - NoSuchElementException when Mandatory Dimensions contains all Dimensions
- [KYLIN-1787] - Properly deal with limit clause in CubeHBaseEndpointRPC (SELECT * problem)
- [KYLIN-1788] - Allow arbitrary number of mandatory dimensions in one aggregation group
- [KYLIN-1789] - Couldn't use View as Lookup when join type is "inner"
- [KYLIN-1795] - bin/sample.sh doesn't work when configured hive client is beeline
- [KYLIN-1800] - IllegalArgumentExceptio: Too many digits for NumberDictionary: -0.009999999999877218. Expect 19 digits before decimal point at max.
- [KYLIN-1803] - ExtendedColumn Measure Encoding with Non-ascii Characters
- [KYLIN-1811] - Error step may be skipped sometimes when resume a cube job
- [KYLIN-1816] - More than one base KylinConfig exist in spring JVM
- [KYLIN-1817] - No result from JDBC with Date filter in prepareStatement
- [KYLIN-1838] - Fix sample cube definition
- [KYLIN-1848] - Can't sort cubes by any field in Web UI
- [KYLIN-1862] - "table not found" in "Build Dimension Dictionary" step

- [KYLIN-1879] - RestAPI /api/jobs always returns 0 for exec_start_time and exec_end_time fields
- [KYLIN-1882] - it report can't find the intermediate table in '#4 Step Name: Build Dimension Dictionary' when use hive view as lookup table
- [KYLIN-1896] - JDBC support mybatis
- [KYLIN-1905] - Wrong Default Date in Cube Build Web UI
- [KYLIN-1909] - Wrong access control to rest get cubes
- [KYLIN-1911] - NPE when extended column has NULL value
- [KYLIN-1912] - Create Intermediate Flat Hive Table failed when using beeline
- [KYLIN-1913] - query log printed abnormally if the query contains "\r" (not "\r\n")
- [KYLIN-1918] - java.lang.UnsupportedOperationException when unload hive table

Improvement

- [KYLIN-1319] - Find a better way to check hadoop job status
- [KYLIN-1379] - More stable and functional precise count distinct implements after KYLIN-1186
- [KYLIN-1656] - Improve performance of MRv2 engine by making each mapper handles a configured number of records
- [KYLIN-1657] - Add new configuration kylin.job.mapreduce.min.reducer.number
- [KYLIN-1669] - Deprecate the "Capacity" field from DataModel
- [KYLIN-1677] - Distribute source data by certain columns when creating flat table
- [KYLIN-1705] - Global (and more scalable) dictionary
- [KYLIN-1706] - Allow cube to override MR job configuration by properties
- [KYLIN-1714] - Make job/source/storage engines configurable from kylin.properties
- [KYLIN-1717] - Make job engine scheduler configurable
- [KYLIN-1718] - Grow ByteBuffer Dynamically in Cube Building and Query
- [KYLIN-1719] - Add config in scan request to control compress the query result or not
- [KYLIN-1724] - Support Amazon EMR
- [KYLIN-1725] - Use KylinConfig inside coprocessor
- [KYLIN-1728] - Introduce dictionary metadata
- [KYLIN-1731] - allow non-admin user to edit 'Advanced Setting' step in CubeDesigner
- [KYLIN-1747] - Calculate all 0 (except mandatory) cuboids
- [KYLIN-1749] - Allow mandatory only cuboid
- [KYLIN-1751] - Make kylin log configurable
- [KYLIN-1766] - CubeTupleConverter.translateResult() is slow due to date conversion
- [KYLIN-1775] - Add Cube Migrate Support for Global Dictionary
- [KYLIN-1782] - API redesign for CubeDesc
- [KYLIN-1786] - Frontend work for KYLIN-1313 (extended columns as measure)
- [KYLIN-1792] - behaviours for non-aggregated queries
- [KYLIN-1805] - It's easily got stuck when deleting HTables during running the StorageCleanupJob
- [KYLIN-1815] - Cleanup package size
- [KYLIN-1818] - change kafka dependency to provided
- [KYLIN-1821] - Reformat all of the java files and enable checkstyle to enforce code formatting
- [KYLIN-1823] - refactor kylin-server packaging
- [KYLIN-1846] - minimize dependencies of JDBC driver
- [KYLIN-1884] - Reload metadata automatically after migrating cube
- [KYLIN-1894] - GlobalDictionary may corrupt when server suddenly crash
- [KYLIN-1744] - Separate concepts of source offset and date range on cube segments
- [KYLIN-1654] - Upgrade httpclient dependency
- [KYLIN-1774] - Update Kylin's tomcat version to 7.0.69
- [KYLIN-1861] - Hive may fail to create flat table with "GC overhead error"

v1.5.2.1 - 2016-06-07

Tag: kylin-1.5.2.1 (https://github.com/apache/kylin/tree/kylin-1.5.2.1)

This is a hot-fix version on v1.5.2, no new feature introduced, please upgrade to this version;

Bug

- [KYLIN-1758] - createLookupHiveViewMaterializationStep will create intermediate table for fact table
- [KYLIN-1739] - kylin_job_conf_inmem.xml can impact non-inmem MR job

v1.5.2 - 2016-05-26

Tag: kylin-1.5.2 (https://github.com/apache/kylin/tree/kylin-1.5.2)

This version is backward compatiple with v1.5.1. But after upgrade to v1.5.2 from v1.5.1, you need to update coprocessor, refer to How to update coprocessor (/docs15/howto/howto_update_coprocessor.html).

Highlights

- [KYLIN-1077] - Support Hive View as Lookup Table
- [KYLIN-1515] - Make Kylin run on MapR
- [KYLIN-1600] - Download diagnosis zip from GUI
- [KYLIN-1672] - support kylin on cdh 5.7

New Feature

- [KYLIN-1016] - Count distinct on any dimension should work even not a predefined measure
- [KYLIN-1077] - Support Hive View as Lookup Table
- [KYLIN-1441] - Display time column as partition column
- [KYLIN-1515] - Make Kylin run on MapR
- [KYLIN-1600] - Download diagnosis zip from GUI
- [KYLIN-1672] - support kylin on cdh 5.7

Improvement

- [KYLIN-869] - Enhance mail notification
- [KYLIN-955] - HiveColumnCardinalityJob should use configurations in conf/kylin_job_conf.xml
- [KYLIN-1313] - Enable deriving dimensions on non PK/FK
- [KYLIN-1323] - Improve performance of converting data to hfile
- [KYLIN-1340] - Tools to extract all cube/hybrid/project related metadata to facilitate diagnosing/debugging/* sharing
- [KYLIN-1381] - change RealizationCapacity from three profiles to specific numbers
- [KYLIN-1391] - quicker and better response to v2 storage engine's rpc timeout exception
- [KYLIN-1418] - Memory hungry cube should select LAYER and INMEM cubing smartly
- [KYLIN-1432] - For GUI, to add one option "yyyy-MM-dd HH:MM:ss" for Partition Date Column
- [KYLIN-1453] - cuboid sharding based on specific column
- [KYLIN-1487] - attach a hyperlink to introduce new aggregation group
- [KYLIN-1526] - Move query cache back to query controller level
- [KYLIN-1542] - Hfile owner is not hbase
- [KYLIN-1544] - Make hbase encoding and block size configurable just like hbase compression
- [KYLIN-1561] - Refactor storage engine(v2) to be extension friendly
- [KYLIN-1566] - Add and use a separate kylin_job_conf.xml for in-mem cubing
- [KYLIN-1567] - Front-end work for KYLIN-1557
- [KYLIN-1578] - Coprocessor thread voluntarily stop itself when it reaches timeout
- [KYLIN-1579] - IT preparation classes like BuildCubeWithEngine should exit with status code upon build * exception
- [KYLIN-1580] - Use 1 byte instead of 8 bytes as column indicator in fact distinct MR job
- [KYLIN-1584] - Specify region cut size in cubedesc and leave the RealizationCapacity in model as a hint
- [KYLIN-1585] - make MAX_HBASE_FUZZY_KEYS in GTScanRangePlanner configurable
- [KYLIN-1587] - show cube level configuration overwrites properties in CubeDesigner
- [KYLIN-1591] - enabling different block size setting for small column families
- [KYLIN-1599] - Add "isShardBy" flag in rowkey panel
- [KYLIN-1601] - Need not to shrink scan cache when hbase rows can be large
- [KYLIN-1602] - User could dump hbase usage for diagnosis
- [KYLIN-1614] - Bring more information in diagnosis tool
- [KYLIN-1621] - Use deflate level 1 to enable compression "on the fly"
- [KYLIN-1623] - Make the hll precision for data samping configurable
- [KYLIN-1624] - HyperLogLogPlusCounter will become inaccurate when there're billions of entries
- [KYLIN-1625] - GC log overwrites old one after restart Kylin service
- [KYLIN-1627] - add backdoor toggle to dump binary cube storage response for further analysis
- [KYLIN-1731] - allow non-admin user to edit 'Advenced Setting' step in CubeDesigner

Bug

- [KYLIN-989] - column width is too narrow for timestamp field
- [KYLIN-1197] - cube data not updated after purge
- [KYLIN-1305] - Can not get more than one system admin email in config
- [KYLIN-1551] - Should check and ensure TopN measure has two parameters specified
- [KYLIN-1563] - Unsafe check of initiated in HybridInstance#init()
- [KYLIN-1569] - Select any column when adding a custom aggregation in GUI
- [KYLIN-1574] - Unclosed ResultSet in QueryService#getMetadata()
- [KYLIN-1581] - NPE in Job engine when execute MR job
- [KYLIN-1593] - Agg group info will be blank when trying to edit cube
- [KYLIN-1595] - columns in metric could also be in filter/groupby
- [KYLIN-1596] - UT fail, due to String encoding CharsetEncoder mismatch
- [KYLIN-1598] - cannot run complete UT at windows dev machine
- [KYLIN-1604] - Concurrent write issue on hdfs when deploy coprocessor
- [KYLIN-1612] - Cube is ready but insight tables not result
- [KYLIN-1615] - UT 'HiveCmdBuilderTest' fail on 'testBeeline'
- [KYLIN-1619] - Can't find any realization coursed by Top-N measure
- [KYLIN-1622] - sql not executed and report topN error
- [KYLIN-1631] - Web UI of TopN, "group by" column couldn't be a dimension column
- [KYLIN-1634] - Unclosed OutputStream in SSHClient#scpFileToLocal()
- [KYLIN-1637] - Sample cube build error
- [KYLIN-1638] - Unclosed HBaseAdmin in ToolUtil#getHBaseMetaStoreId()
- [KYLIN-1639] - Wrong logging of JobID in MapReduceExecutable.java
- [KYLIN-1643] - Kylin's hll counter count "NULL" as a value
- [KYLIN-1647] - Purge a cube, and then build again, the start date is not updated
- [KYLIN-1650] - java.io.IOException: Filesystem closed - in Cube Build Step 2 (MapR)
- [KYLIN-1655] - function name 'getKylinPropertiesAsInputSteam' misspelt
- [KYLIN-1660] - Streaming/kafka config not match with table name
- [KYLIN-1662] - tableName got truncated during request mapping for /tables/tableName
- [KYLIN-1666] - Should check project selection before add a stream table
- [KYLIN-1667] - Streaming table name should allow enter "DB.TABLE" format
- [KYLIN-1673] - make sure metadata in 1.5.2 compatible with 1.5.1
- [KYLIN-1678] - MetaData clean just clean FINISHED and DISCARD jobs,but job correct status is SUCCEED
- [KYLIN-1685] - error happens while execute a sql contains '?' using Statement
- [KYLIN-1688] - Illegal char on result dataset table
- [KYLIN-1721] - KylinConfigExt lost base properties when store into file
- [KYLIN-1722] - IntegerDimEnc serialization exception inside coprocessor

v1.5.1 - 2016-04-13

Tag: kylin-1.5.1 (https://github.com/apache/kylin/tree/kylin-1.5.1)

This version is backward compatiple with v1.5.0. But after upgrade to v1.5.1 from v1.5.0, you need to update coprocessor, refer to How to update coprocessor (/docs15/howto/howto_update_coprocessor.html).

Highlights

- [KYLIN-1122] - Kylin support detail data query from fact table
- [KYLIN-1492] - Custom dimension encoding
- [KYLIN-1495] - Metadata upgrade from 1.0~1.3 to 1.5, including metadata correction, relevant tools, etc.
- [KYLIN-1534] - Cube specific config, override global kylin.properties
- [KYLIN-1546] - Tool to dump information for diagnosis

New Feature

- [KYLIN-1122] - Kylin support detail data query from fact table
- [KYLIN-1378] - Add UI for TopN measure
- [KYLIN-1492] - Custom dimension encoding
- [KYLIN-1495] - Metadata upgrade from 1.0~1.3 to 1.5, including metadata correction, relevant tools, etc.
- [KYLIN-1501] - Run some classes at the beginning of kylin server startup
- [KYLIN-1503] - Print version information with kylin.sh

- [KYLIN-1531] - Add smoke test scripts
- [KYLIN-1534] - Cube specific config, override global kylin.properties
- [KYLIN-1540] - REST API for deleting segment
- [KYLIN-1541] - IntegerDimEnc, custom dimension encoding for integers
- [KYLIN-1546] - Tool to dump information for diagnosis
- [KYLIN-1550] - Persist some recent bad query

Improvement

- [KYLIN-1490] - Use InstallShield 2015 to generate ODBC Driver setup files
- [KYLIN-1498] - cube desc signature not calculated correctly
- [KYLIN-1500] - streaming_fillgap cause out of memory
- [KYLIN-1502] - When cube is not empty, only signature consistent cube desc updates are allowed
- [KYLIN-1504] - Use NavigableSet to store rowkey and use prefix filter to check resource path prefix instead String comparison on tomcat side
- [KYLIN-1505] - Combine guava filters with Predicates.and
- [KYLIN-1543] - GTFilterScanner performance tuning
- [KYLIN-1557] - Enhance the check on aggregation group dimension number

Bug

- [KYLIN-1373] - need to encode export query url to get right result in query page
- [KYLIN-1434] - Kylin Job Monitor API: /kylin/api/jobs is too slow in large kylin deployment
- [KYLIN-1472] - Export csv get error when there is a plus sign in the sql
- [KYLIN-1486] - java.lang.IllegalArgumentException: Too many digits for NumberDictionary
- [KYLIN-1491] - Should return base cuboid as valid cuboid if no aggregation group matches
- [KYLIN-1493] - make ExecutableManager.getInstance thread safe
- [KYLIN-1497] - Make three .getInstance thread safe
- [KYLIN-1507] - Couldn't find hive dependency jar on some platform like CDH
- [KYLIN-1513] - Time partitioning doesn't work across multiple days
- [KYLIN-1514] - MD5 validation of Tomcat does not work when package tar
- [KYLIN-1521] - Couldn't refresh a cube segment whose start time is before 1970-01-01
- [KYLIN-1522] - HLLC is incorrect when result is feed from cache
- [KYLIN-1524] - Get "java.lang.Double cannot be cast to java.lang.Long" error when Top-N metris data type is BigInt
- [KYLIN-1527] - Columns with all NULL values can't be queried
- [KYLIN-1537] - Failed to create flat hive table, when name is too long
- [KYLIN-1538] - DoubleDeltaSerializer cause obvious error after deserialize and serialize
- [KYLIN-1553] - Cannot find rowkey column "COL_NAME" in cube CubeDesc
- [KYLIN-1564] - Unclosed table in BuildCubeWithEngine#checkHFilesInHBase()
- [KYLIN-1569] - Select any column when adding a custom aggregation in GUI

v1.5.0 - 2016-03-12

Tag: kylin-1.5.0 (https://github.com/apache/kylin/tree/kylin-1.5.0)

This version is not backward compatible. The format of cube and metadata has been refactored in order to get times of performance improvement. We recommend this version, but does not suggest upgrade from previous deployment directly. A clean and new deployment of this version is strongly recommended. If you have to upgrade from previous deployment, an upgrade guide will be provided by community later.

Highlights

- [KYLIN-875] - A plugin-able architecture, to allow alternative cube engine / storage engine / data source.
- [KYLIN-1245] - A better MR cubing algorithm, about 1.5 times faster by comparing hundreds of jobs.
- [KYLIN-942] - A better storage engine, makes query roughly 2 times faster (especially for slow queries) by comparing tens of thousands sqls.
- [KYLIN-738] - Streaming cubing EXPERIMENTAL support, source from kafka, build cube in-mem at minutes interval.
- [KYLIN-242] - Redesign aggregation group, support of 20+ dimensions made easy.
- [KYLIN-976] - Custom aggregation types (or UDF in other words).
- [KYLIN-943] - TopN aggregation type.
- [KYLIN-1065] - ODBC compatible with Tableau 9.1, MS Excel, MS PowerBI.

- [KYLIN-1219] - Kylin support SSO with Spring SAML.

New Feature

- [KYLIN-528] - Build job flow for Inverted Index building
- [KYLIN-579] - Unload table from Kylin
- [KYLIN-596] - Support Excel and Power BI
- [KYLIN-599] - Near real-time support
- [KYLIN-607] - More efficient cube building
- [KYLIN-609] - Add Hybrid as a federation of Cube and Inverted-index realization
- [KYLIN-625] - Create GridTable, a data structure that abstracts vertical and horizontal partition of a table
- [KYLIN-728] - IGTStore implementation which use disk when memory runs short
- [KYLIN-738] - StreamingOLAP
- [KYLIN-749] - support timestamp type in II and cube
- [KYLIN-774] - Automatically merge cube segments
- [KYLIN-868] - add a metadata backup/restore script in bin folder
- [KYLIN-886] - Data Retention for streaming data
- [KYLIN-906] - cube retention
- [KYLIN-943] - Approximate TopN supported by Cube
- [KYLIN-986] - Generalize Streaming scripts and put them into code repository
- [KYLIN-1219] - Kylin support SSO with Spring SAML
- [KYLIN-1277] - Upgrade tool to put old-version cube and new-version cube into a hybrid model
- [KYLIN-1458] - Checking the consistency of cube segment host with the environment after cube migration

- [KYLIN-976] - Support Custom Aggregation Types
- [KYLIN-1054] - Support Hive client Beeline
- [KYLIN-1128] - Clone Cube Metadata
- [KYLIN-1186] - Support precise Count Distinct using bitmap (under limited conditions)
- [KYLIN-1458] - Checking the consistency of cube segment host with the environment after cube migration
- [KYLIN-1483] - Command tool to visualize all cuboids in a cube/segment

Improvement

- [KYLIN-225] - Support edit "cost" of cube
- [KYLIN-410] - table schema not expand when clicking the database text
- [KYLIN-589] - Cleanup Intermediate hive table after cube build
- [KYLIN-623] - update Kylin UI Style to latest AdminLTE
- [KYLIN-633] - Support Timestamp for cube partition
- [KYLIN-649] - move the cache layer from service tier back to storage tier
- [KYLIN-655] - Migrate cube storage (query side) to use GridTable API
- [KYLIN-663] - Push time condition down to ii endpoint
- [KYLIN-668] - Out of memory in mapper when building cube in mem
- [KYLIN-671] - Implement fine grained cache for cube and ii
- [KYLIN-674] - IIEndpoint return metrics as well
- [KYLIN-675] - cube&model designer refactor
- [KYLIN-678] - optimize RowKeyColumnIO
- [KYLIN-697] - Reorganize all test cases to unit test and integration tests
- [KYLIN-702] - When Kylin create the flat hive table, it generates large number of small files in HDFS
- [KYLIN-708] - replace BitSet for AggrKey
- [KYLIN-712] - some enhancement after code review
- [KYLIN-717] - optimize OLAPEnumerator.convertCurrentRow()
- [KYLIN-718] - replace aliasMap in storage context with a clear specified return column list
- [KYLIN-719] - bundle statistics info in endpoint response
- [KYLIN-720] - Optimize endpoint's response structure to suit with no-dictionary data
- [KYLIN-721] - streaming cli support third-party streammessage parser
- [KYLIN-726] - add remote cli port configuration for KylinConfig
- [KYLIN-729] - IIEndpoint eliminate the non-aggregate routine
- [KYLIN-734] - Push cache layer to each storage engine
- [KYLIN-752] - Improved IN clause performance

- [KYLIN-753] - Make the dependency on hbase-common to "provided"
- [KYLIN-755] - extract copying libs from prepare.sh so that it can be reused
- [KYLIN-760] - Improve the hasing performance in Sampling cuboid size
- [KYLIN-772] - Continue cube job when hive query return empty resultset
- [KYLIN-773] - performance is slow list jobs
- [KYLIN-783] - update hdp version in test cases to 2.2.4
- [KYLIN-796] - Add REST API to trigger storage cleanup/GC
- [KYLIN-809] - Streaming cubing allow multiple kafka clusters/topics
- [KYLIN-816] - Allow gap in cube segments, for streaming case
- [KYLIN-822] - list cube overview in one page
- [KYLIN-823] - replace fk on fact table on rowkey & aggregation group generate
- [KYLIN-838] - improve performance of job query
- [KYLIN-844] - add backdoor toggles to control query behavior
- [KYLIN-845] - Enable coprocessor even when there is memory hungry distinct count
- [KYLIN-858] - add snappy compression support
- [KYLIN-866] - Confirm with user when he selects empty segments to merge
- [KYLIN-869] - Enhance mail notification
- [KYLIN-870] - Speed up hbase segments info by caching
- [KYLIN-871] - growing dictionary for streaming case
- [KYLIN-874] - script for fill streaming gap automatically
- [KYLIN-875] - Decouple with Hadoop to allow alternative Input / Build Engine / Storage
- [KYLIN-879] - add a tool to collect orphan hbases
- [KYLIN-880] - Kylin should change the default folder from /tmp to user configurable destination
- [KYLIN-881] - Upgrade Calcite to 1.3.0
- [KYLIN-882] - check access to kylin.hdfs.working.dir
- [KYLIN-883] - Using configurable option for Hive intermediate tables created by Kylin job
- [KYLIN-893] - Remove the dependency on quartz and metrics
- [KYLIN-895] - Add "retention_range" attribute for cube instance, and automatically drop the oldest segment when exceeds retention
- [KYLIN-896] - Clean ODBC code, add them into main repository and write docs to help compiling
- [KYLIN-901] - Add tool for cleanup Kylin metadata storage
- [KYLIN-902] - move streaming related parameters into StreamingConfig
- [KYLIN-909] - Adapt GTStore to hbase endpoint
- [KYLIN-919] - more friendly UI for 0.8
- [KYLIN-922] - Enforce same code style for both intellij and eclipse user
- [KYLIN-926] - Make sure Kylin leaves no garbage files in local OS and HDFS/HBASE
- [KYLIN-927] - Real time cubes merging skipping gaps
- [KYLIN-933] - friendly UI to use data model
- [KYLIN-938] - add friendly tip to page when rest request failed
- [KYLIN-942] - Cube parallel scan on Hbase
- [KYLIN-956] - Allow users to configure hbase compression algorithm in kylin.properties
- [KYLIN-957] - Support HBase in a separate cluster
- [KYLIN-960] - Split storage module to core-storage and storage-hbase
- [KYLIN-973] - add a tool to analyse streaming output logs
- [KYLIN-984] - Behavior change in streaming data consuming
- [KYLIN-987] - Rename 0.7-staging and 0.8 branch
- [KYLIN-1014] - Support kerberos authentication while getting status from RM
- [KYLIN-1018] - make TimedJsonStreamParser default parser
- [KYLIN-1019] - Remove v1 cube model classes from code repository
- [KYLIN-1021] - upload dependent jars of kylin to HDFS and set tmpjars
- [KYLIN-1025] - Save cube change is very slow
- [KYLIN-1036] - Code Clean, remove code which never used at front end
- [KYLIN-1041] - ADD Streaming UI
- [KYLIN-1048] - CPU and memory killer in Cuboid.findById()
- [KYLIN-1058] - Remove "right join" during model creation
- [KYLIN-1061] - "kylin.sh start" should check whether kylin has already been running
- [KYLIN-1064] - restore disabled queries in KylinQueryTest.testVerifyQuery
- [KYLIN-1065] - ODBC driver support tableau 9.1

- [KYLIN-1068] - Optimize the memory footprint for TopN counter
- [KYLIN-1069] - update tip for 'Partition Column' on UI
- [KYLIN-1074] - Load hive tables with selecting mode
- [KYLIN-1095] - Update AdminLTE to latest version
- [KYLIN-1096] - Deprecate minicluster
- [KYLIN-1099] - Support dictionary of cardinality over 10 millions
- [KYLIN-1101] - Allow "YYYYMMDD" as a date partition column
- [KYLIN-1105] - Cache in AbstractRowKeyEncoder.createInstance() is useless
- [KYLIN-1116] - Use local dictionary for InvertedIndex batch building
- [KYLIN-1119] - refine find-hive-dependency.sh to correctly get hcatalog path
- [KYLIN-1126] - v2 storage(for parallel scan) backward compatibility with v1 storage
- [KYLIN-1135] - Pscan use share thread pool
- [KYLIN-1136] - Distinguish fast build mode and complete build mode
- [KYLIN-1139] - Hive job not starting due to error "conflicting lock present for default mode EXCLUSIVE "
- [KYLIN-1149] - When yarn return an incomplete job tracking URL, Kylin will fail to get job status
- [KYLIN-1154] - Load job page is very slow when there are a lot of history job
- [KYLIN-1157] - CubeMigrationCLI doesn't copy ACL
- [KYLIN-1160] - Set default logger appender of log4j for JDBC
- [KYLIN-1161] - Rest API /api/cubes?cubeName= is doing fuzzy match instead of exact match
- [KYLIN-1162] - Enhance HadoopStatusGetter to be compatible with YARN-2605
- [KYLIN-1190] - Make memory budget per query configurable
- [KYLIN-1211] - Add 'Enable Cache' button in System page
- [KYLIN-1234] - Cube ACL does not work
- [KYLIN-1235] - allow user to select dimension column as options when edit COUNT_DISTINCT measure
- [KYLIN-1237] - Revisit on cube size estimation
- [KYLIN-1239] - attribute each htable with team contact and owner name
- [KYLIN-1244] - In query window, enable fast copy&paste by double clicking tables/columns' names.
- [KYLIN-1245] - Switch between layer cubing and in-mem cubing according to stats
- [KYLIN-1246] - get cubes API update - offset,limit not required
- [KYLIN-1251] - add toggle event for tree label
- [KYLIN-1259] - Change font/background color of job progress
- [KYLIN-1265] - Make sure 1.4-rc query is no slower than 1.0
- [KYLIN-1266] - Tune release package size
- [KYLIN-1267] - Check Kryo performance when spilling aggregation cache
- [KYLIN-1268] - Fix 2 kylin logs
- [KYLIN-1270] - improve TimedJsonStreamParser to support month_start,quarter_start,year_start
- [KYLIN-1281] - Add "partition_date_end" , and move "partition_date_start" into cube descriptor
- [KYLIN-1283] - Replace GTScanRequest's SerDer form Kryo to manual
- [KYLIN-1287] - UI update for streaming build action
- [KYLIN-1297] - Diagnose query performance issues in 1.4 branch
- [KYLIN-1301] - fix segment pruning failure
- [KYLIN-1308] - query storage v2 enable parallel cube visiting
- [KYLIN-1312] - Enhance DeployCoprocessorCLI to support Cube level filter
- [KYLIN-1317] - Kill underlying running hadoop job while discard a job
- [KYLIN-1318] - enable gc log for kylin server instance
- [KYLIN-1323] - Improve performance of converting data to hfile
- [KYLIN-1327] - Tool for batch updating host information of htables
- [KYLIN-1333] - Kylin Entity Permission Control
- [KYLIN-1334] - allow truncating string for fixed length dimensions
- [KYLIN-1341] - Display JSON of Data Model in the dialog
- [KYLIN-1350] - hbase Result.binarySearch is found to be problematic in concurrent environments
- [KYLIN-1365] - Kylin ACL enhancement
- [KYLIN-1368] - JDBC Driver is not generic to restAPI json result
- [KYLIN-1424] - Should support multiple selection in picking up dimension/measure column step in data model wizard
- [KYLIN-1438] - auto generate aggregation group
- [KYLIN-1474] - expose list, remove and cat in metastore.sh
- [KYLIN-1475] - Inject ehcache manager for any test case that will touch ehcache manager

- [KYLIN-242] - Redesign aggregation group
- [KYLIN-770] - optimize memory usage for GTSimpleMemStore GTAggregationScanner
- [KYLIN-955] - HiveColumnCardinalityJob should use configurations in conf/kylin_job_conf.xml
- [KYLIN-980] - FactDistinctColumnsJob to support high cardinality columns
- [KYLIN-1079] - Manager large number of entries in metadata store
- [KYLIN-1082] - Hive dependencies should be add to tmpjars
- [KYLIN-1201] - Enhance project level ACL
- [KYLIN-1222] - restore testing v1 query engine in case need it as a fallback for v2
- [KYLIN-1232] - Refine ODBC Connection UI
- [KYLIN-1237] - Revisit on cube size estimation
- [KYLIN-1239] - attribute each htable with team contact and owner name
- [KYLIN-1245] - Switch between layer cubing and in-mem cubing according to stats
- [KYLIN-1265] - Make sure 1.4-rc query is no slower than 1.0
- [KYLIN-1266] - Tune release package size
- [KYLIN-1270] - improve TimedJsonStreamParser to support month_start,quarter_start,year_start
- [KYLIN-1283] - Replace GTScanRequest's SerDer form Kryo to manual
- [KYLIN-1297] - Diagnose query performance issues in 1.4 branch
- [KYLIN-1301] - fix segment pruning failure
- [KYLIN-1308] - query storage v2 enable parallel cube visiting
- [KYLIN-1318] - enable gc log for kylin server instance
- [KYLIN-1327] - Tool for batch updating host information of htables
- [KYLIN-1343] - Upgrade calcite version to 1.6
- [KYLIN-1350] - hbase Result.binarySearch is found to be problematic in concurrent environments
- [KYLIN-1366] - Bind metadata version with release version
- [KYLIN-1389] - Formatting ODBC Drive C++ code
- [KYLIN-1405] - Aggregation group validation
- [KYLIN-1465] - Beautify kylin log to convenience both production trouble shooting and CI debuging
- [KYLIN-1475] - Inject ehcache manager for any test case that will touch ehcache manager

Bug

- [KYLIN-404] - Can't get cube source record size.
- [KYLIN-457] - log4j error and dup lines in kylin.log
- [KYLIN-521] - No verification even if join condition is invalid
- [KYLIN-632] - "kylin.sh stop" doesn't check whether KYLIN_HOME was set
- [KYLIN-635] - IN clause within CASE when is not working
- [KYLIN-656] - REST API get cube desc NullPointerException when cube is not exists
- [KYLIN-660] - Make configurable of dictionary cardinality cap
- [KYLIN-665] - buffer error while in mem cubing
- [KYLIN-688] - possible memory leak for segmentIterator
- [KYLIN-731] - Parallel stream build will throw OOM
- [KYLIN-740] - Slowness with many IN() values
- [KYLIN-747] - bad query performance when IN clause contains a value doesn't exist in the dictionary
- [KYLIN-748] - II returned result not correct when decimal omits precision and scal
- [KYLIN-751] - Max on negative double values is not working
- [KYLIN-766] - round BigDecimal according to the DataType scale
- [KYLIN-769] - empty segment build fail due to no dictionary
- [KYLIN-771] - query cache is not evicted when metadata changes
- [KYLIN-778] - can't build cube after package to binary
- [KYLIN-780] - Upgrade Calcite to 1.0
- [KYLIN-797] - Cuboid cache will cache massive invalid cuboid if existed many cubes which already be deleted
- [KYLIN-801] - fix remaining issues on query cache and storage cache
- [KYLIN-805] - Drop useless Hive intermediate table and HBase tables in the last step of cube build/merge
- [KYLIN-807] - Avoid write conflict between job engine and stream cube builder
- [KYLIN-817] - Support Extract() on timestamp column
- [KYLIN-824] - Cube Build fails if lookup table doesn't have any files under HDFS location
- [KYLIN-828] - kylin still use ldap profile when comment the line "kylin.sandbox=false" in kylin.properties
- [KYLIN-834] - optimize StreamingUtil binary search perf

- [KYLIN-837] - fix submit build type when refresh cube
- [KYLIN-873] - cancel button does not work when [resume][discard] job
- [KYLIN-889] - Support more than one HDFS files of lookup table
- [KYLIN-897] - Update CubeMigrationCLI to copy data model info
- [KYLIN-898] - "CUBOID_CACHE" in Cuboid.java never flushes
- [KYLIN-905] - Boolean type not supported
- [KYLIN-911] - NEW segments not DELETED when cancel BuildAndMerge Job
- [KYLIN-912] - $KYLIN_HOME/tomcat/temp folder takes much disk space after long run
- [KYLIN-913] - Cannot find rowkey column XXX in cube CubeDesc
- [KYLIN-914] - Scripts shebang should use /bin/bash
- [KYLIN-918] - Calcite throws "java.lang.Float cannot be cast to java.lang.Double" error while executing SQL
- [KYLIN-929] - can not sort cubes by [Source Records] at cubes list page
- [KYLIN-930] - can't see realizations under each project at project list page
- [KYLIN-934] - Negative number in SUM result and Kylin results not matching exactly Hive results
- [KYLIN-935] - always loading when try to view the log of the sub-step of cube build job
- [KYLIN-936] - can not see job step log
- [KYLIN-944] - update doc about how to consume kylin API in javascript
- [KYLIN-946] - [UI] refresh page show no results when Project selected as [–Select All–]
- [KYLIN-950] - Web UI "Jobs" tab view the job reduplicated
- [KYLIN-951] - Drop RowBlock concept from GridTable general API
- [KYLIN-952] - User can trigger a Refresh job on an non-existing cube segment via REST API
- [KYLIN-967] - Dump running queries on memory shortage
- [KYLIN-975] - change kylin.job.hive.database.for.intermediatetable cause job to fail
- [KYLIN-978] - GarbageCollectionStep dropped Hive Intermediate Table but didn't drop external hdfs path
- [KYLIN-982] - package.sh should grep out "Download*" messages when determining version
- [KYLIN-983] - Query sql offset keyword bug
- [KYLIN-985] - Don't suppoprt aggregation AVG while executing SQL
- [KYLIN-991] - StorageCleanupJob may clean a newly created HTable in streaming cube building
- [KYLIN-992] - ConcurrentModificationException when initializing ResourceStore
- [KYLIN-993] - implement substr support in kylin
- [KYLIN-1001] - Kylin generates wrong HDFS path in creating intermediate table
- [KYLIN-1004] - Dictionary with '' value cause cube merge to fail
- [KYLIN-1020] - Although "kylin.query.scan.threshold" is set, it still be restricted to less than 4 million
- [KYLIN-1026] - Error message for git check is not correct in package.sh
- [KYLIN-1027] - HBase Token not added after KYLIN-1007
- [KYLIN-1033] - Error when joining two sub-queries
- [KYLIN-1039] - Filter like (A or false) yields wrong result
- [KYLIN-1047] - Upgrade to Calcite 1.4
- [KYLIN-1066] - Only 1 reducer is started in the "Build cube" step of MR_Engine_V2
- [KYLIN-1067] - Support get MapReduce Job status for ResourceManager HA Env
- [KYLIN-1075] - select [MeasureCol] from [FactTbl] is not supported
- [KYLIN-1093] - Consolidate getCurrentHBaseConfiguration() and newHBaseConfiguration() in HadoopUtil
- [KYLIN-1106] - Can not send email caused by Build Base Cuboid Data step failed
- [KYLIN-1108] - Return Type Empty When Measure-> Count In Cube Design
- [KYLIN-1113] - Support TopN query in v2/CubeStorageQuery.java
- [KYLIN-1115] - Clean up ODBC driver code
- [KYLIN-1121] - ResourceTool download/upload does not work in binary package
- [KYLIN-1127] - Refactor CacheService
- [KYLIN-1137] - TopN measure need support dictionary merge
- [KYLIN-1138] - Bad CubeDesc signature cause segment be delete when enable a cube
- [KYLIN-1140] - Kylin's sample cube "kylin_sales_cube" couldn't be saved.
- [KYLIN-1151] - Menu items should be aligned when create new model
- [KYLIN-1152] - ResourceStore should read content and timestamp in one go
- [KYLIN-1153] - Upgrade is needed for cubedesc metadata from 1.3 to 1.4
- [KYLIN-1171] - KylinConfig truncate bug
- [KYLIN-1179] - Cannot use String as partition column
- [KYLIN-1180] - Some NPE in Dictionary

- [KYLIN-1181] - Split metadata size exceeded when data got huge in one segment
- [KYLIN-1182] - DataModelDesc needs to be updated from v1.x to v2.0
- [KYLIN-1192] - Cannot edit data model desc without name change
- [KYLIN-1205] - hbase RpcClient java.io.IOException: Unexpected closed connection
- [KYLIN-1216] - Can't parse DateFormat like 'YYYYMMDD' correctly in query
- [KYLIN-1218] - java.lang.NullPointerException in MeasureTypeFactory when sync hive table
- [KYLIN-1220] - JsonMappingException: Can not deserialize instance of java.lang.String out of START_ARRAY
- [KYLIN-1225] - Only 15 cubes listed in the /models page
- [KYLIN-1226] - InMemCubeBuilder throw OOM for multiple HLLC measures
- [KYLIN-1230] - When CubeMigrationCLI copied ACL from one env to another, it may not work
- [KYLIN-1236] - redirect to home page when input invalid url
- [KYLIN-1250] - Got NPE when discarding a job
- [KYLIN-1260] - Job status labels are not in same style
- [KYLIN-1269] - Can not get last error message in email
- [KYLIN-1271] - Create streaming table layer will disappear if click on outside
- [KYLIN-1274] - Query from JDBC is partial results by default
- [KYLIN-1282] - Comparison filter on Date/Time column not work for query
- [KYLIN-1289] - Click on subsequent wizard steps doesn't work when editing existing cube or model
- [KYLIN-1303] - Error when in-mem cubing on empty data source which has boolean columns
- [KYLIN-1306] - Null strings are not applied during fast cubing
- [KYLIN-1314] - Display issue for aggression groups
- [KYLIN-1315] - UI: Cannot add normal dimension when creating new cube
- [KYLIN-1316] - Wrong label in Dialog CUBE REFRESH CONFIRM
- [KYLIN-1328] - "UnsupportedOperationException" is thrown when remove a data model
- [KYLIN-1330] - UI create model: Press enter will go back to pre step
- [KYLIN-1336] - 404 errors of model page and api 'access/DataModelDesc' in console
- [KYLIN-1337] - Sort cube name doesn't work well
- [KYLIN-1346] - IllegalStateException happens in SparkCubing
- [KYLIN-1347] - UI: cannot place cursor in front of the last dimension
- [KYLIN-1349] - 'undefined' is logged in console when adding lookup table
- [KYLIN-1352] - 'Cache already exists' exception in high-concurrency query situation
- [KYLIN-1356] - use exec-maven-plugin for IT environment provision
- [KYLIN-1357] - Cloned cube has build time information
- [KYLIN-1372] - Query using PrepareStatement failed with multi OR clause
- [KYLIN-1382] - CubeMigrationCLI reports error when migrate cube
- [KYLIN-1387] - Streaming cubing doesn't generate cuboids files on HDFS, cause cube merge failure
- [KYLIN-1396] - minor bug in BigDecimalSerializer - avoidVerbose should be incremented each time when input scale is larger than given scale
- [KYLIN-1400] - kylin.metadata.url with hbase namespace problem
- [KYLIN-1402] - StringIndexOutOfBoundsException in Kylin Hive Column Cardinality Job
- [KYLIN-1412] - Widget width of "Partition date column" is too small to select
- [KYLIN-1413] - Row key column's sequence is wrong after saving the cube
- [KYLIN-1414] - Couldn't drag and drop rowkey, js error is thrown in browser console
- [KYLIN-1417] - TimedJsonStreamParser is case sensitive for message's property name
- [KYLIN-1419] - NullPointerException occurs when query from subqueries with order by
- [KYLIN-1420] - Query returns empty result on partition column's boundary condition
- [KYLIN-1421] - Cube "source record" is always zero for streaming
- [KYLIN-1423] - HBase size precision issue
- [KYLIN-1430] - Not add "STREAMING_" prefix when import a streaming table
- [KYLIN-1443] - For setting Auto Merge Time Ranges, before sending them to backend, the related time ranges should be sorted increasingly
- [KYLIN-1456] - Shouldn't use "1970-01-01" as the default end date
- [KYLIN-1471] - LIMIT after having clause should not be pushed down to storage context
-
- [KYLIN-1104] - Long dimension value cause ArrayIndexOutOfBoundsException
- [KYLIN-1331] - UI Delete Aggregation Groups: cursor disappeared after delete 1 dimension
- [KYLIN-1344] - Bitmap measure defined after TopN measure can cause merge to fail

- [KYLIN-1356] - use exec-maven-plugin for IT environment provision
- [KYLIN-1386] - Duplicated projects appear in connection dialog after clicking CONNECT button multiple times
- [KYLIN-1396] - minor bug in BigDecimalSerializer - avoidVerbose should be incremented each time when input scale is larger than given scale
- [KYLIN-1419] - NullPointerException occurs when query from subqueries with order by
- [KYLIN-1445] - Kylin should throw error if HIVE_CONF dir cannot be found
- [KYLIN-1466] - Some environment variables are not used in bin/kylin.sh
- [KYLIN-1469] - Hive dependency jars are hard coded in test
- [KYLIN-1471] - LIMIT after having clause should not be pushed down to storage context
- [KYLIN-1473] - Cannot have comments in the end of New Query textbox

Task

- [KYLIN-529] - Migrate ODBC source code to Apache Git
- [KYLIN-650] - Move all document from github wiki to code repository (using md file)
- [KYLIN-762] - remove quartz dependency
- [KYLIN-763] - remove author name
- [KYLIN-820] - support streaming cube of exact timestamp range
- [KYLIN-907] - Improve Kylin community development experience
- [KYLIN-1112] - Reorganize InvertedIndex source codes into plug-in architecture

- [KYLIN-808] - streaming cubing support split by data timestamp
- [KYLIN-1427] - Enable partition date column to support date and hour as separate columns for increment cube build

Test

- [KYLIN-677] - benchmark for Endpoint without dictionary
- [KYLIN-826] - create new test case for streaming building & queries

v1.3.0 - 2016-03-14

Tag: kylin-1.3.0 (https://github.com/apache/kylin/tree/kylin-1.3.0)

New Feature

- [KYLIN-579] - Unload table from Kylin
- [KYLIN-976] - Support Custom Aggregation Types
- [KYLIN-1054] - Support Hive client Beeline
- [KYLIN-1128] - Clone Cube Metadata
- [KYLIN-1186] - Support precise Count Distinct using bitmap (under limited conditions)

Improvement

- [KYLIN-955] - HiveColumnCardinalityJob should use configurations in conf/kylin_job_conf.xml
- [KYLIN-1014] - Support kerberos authentication while getting status from RM
- [KYLIN-1074] - Load hive tables with selecting mode
- [KYLIN-1082] - Hive dependencies should be add to tmpjars
- [KYLIN-1132] - make filtering input easier in creating cube
- [KYLIN-1201] - Enhance project level ACL
- [KYLIN-1211] - Add 'Enable Cache' button in System page
- [KYLIN-1234] - Cube ACL does not work
- [KYLIN-1240] - Fix link and typo in README
- [KYLIN-1244] - In query window, enable fast copy&paste by double clicking tables/columns' names.
- [KYLIN-1246] - get cubes API update - offset,limit not required
- [KYLIN-1251] - add toggle event for tree label
- [KYLIN-1259] - Change font/background color of job progress
- [KYLIN-1312] - Enhance DeployCoprocessorCLI to support Cube level filter
- [KYLIN-1317] - Kill underlying running hadoop job while discard a job
- [KYLIN-1323] - Improve performance of converting data to hfile
- [KYLIN-1333] - Kylin Entity Permission Control
- [KYLIN-1343] - Upgrade calcite version to 1.6

- [KYLIN-1365] - Kylin ACL enhancement
- [KYLIN-1368] - JDBC Driver is not generic to restAPI json result

Bug

- [KYLIN-918] - Calcite throws "java.lang.Float cannot be cast to java.lang.Double" error while executing SQL
- [KYLIN-1075] - select [MeasureCol] from [FactTbl] is not supported
- [KYLIN-1078] - Cannot have comments in the end of New Query textbox
- [KYLIN-1104] - Long dimension value cause ArrayIndexOutOfBoundsException
- [KYLIN-1110] - can not see project options after clear brower cookie and cache
- [KYLIN-1159] - problem about kylin web UI
- [KYLIN-1214] - Remove "Back to My Cubes" link in non-edit mode
- [KYLIN-1215] - minor, update website member's info on community page
- [KYLIN-1230] - When CubeMigrationCLI copied ACL from one env to another, it may not work
- [KYLIN-1236] - redirect to home page when input invalid url
- [KYLIN-1250] - Got NPE when discarding a job
- [KYLIN-1254] - cube model will be overridden while creating a new cube with the same name
- [KYLIN-1260] - Job status labels are not in same style
- [KYLIN-1274] - Query from JDBC is partial results by default
- [KYLIN-1316] - Wrong label in Dialog CUBE REFRESH CONFIRM
- [KYLIN-1330] - UI create model: Press enter will go back to pre step
- [KYLIN-1331] - UI Delete Aggregation Groups: cursor disappeared after delete 1 dimension
- [KYLIN-1342] - Typo in doc
- [KYLIN-1354] - Couldn't edit a cube if it has no "partition date" set
- [KYLIN-1372] - Query using PrepareStatement failed with multi OR clause
- [KYLIN-1396] - minor bug in BigDecimalSerializer - avoidVerbose should be incremented each time when input scale is larger than given scale
- [KYLIN-1400] - kylin.metadata.url with hbase namespace problem
- [KYLIN-1402] - StringIndexOutOfBoundsException in Kylin Hive Column Cardinality Job
- [KYLIN-1412] - Widget width of "Partition date column" is too small to select
- [KYLIN-1419] - NullPointerException occurs when query from subqueries with order by
- [KYLIN-1423] - HBase size precision issue
- [KYLIN-1443] - For setting Auto Merge Time Ranges, before sending them to backend, the related time ranges should be sorted increasingly
- [KYLIN-1445] - Kylin should throw error if HIVE_CONF dir cannot be found
- [KYLIN-1456] - Shouldn't use "1970-01-01" as the default end date
- [KYLIN-1466] - Some environment variables are not used in bin/kylin.sh
- [KYLIN-1469] - Hive dependency jars are hard coded in test

Test

- [KYLIN-1335] - Disable PrintResult in KylinQueryTest

v1.2 - 2015-12-15

Tag: kylin-1.2 (https://github.com/apache/kylin/tree/kylin-1.2)

New Feature

- [KYLIN-596] - Support Excel and Power BI

Improvement

- [KYLIN-389] - Can't edit cube name for existing cubes
- [KYLIN-702] - When Kylin create the flat hive table, it generates large number of small files in HDFS
- [KYLIN-1021] - upload dependent jars of kylin to HDFS and set tmpjars
- [KYLIN-1058] - Remove "right join" during model creation
- [KYLIN-1064] - restore disabled queries in KylinQueryTest.testVerifyQuery
- [KYLIN-1065] - ODBC driver support tableau 9.1
- [KYLIN-1069] - update tip for 'Partition Column' on UI
- [KYLIN-1081] - ./bin/find-hive-dependency.sh may not find hive-hcatalog-core.jar

- [KYLIN-1095] - Update AdminLTE to latest version
- [KYLIN-1099] - Support dictionary of cardinality over 10 millions
- [KYLIN-1101] - Allow "YYYYMMDD" as a date partition column
- [KYLIN-1105] - Cache in AbstractRowKeyEncoder.createInstance() is useless
- [KYLIN-1119] - refine find-hive-dependency.sh to correctly get hcatalog path
- [KYLIN-1139] - Hive job not starting due to error "conflicting lock present for default mode EXCLUSIVE "
- [KYLIN-1149] - When yarn return an incomplete job tracking URL, Kylin will fail to get job status
- [KYLIN-1154] - Load job page is very slow when there are a lot of history job
- [KYLIN-1157] - CubeMigrationCLI doesn't copy ACL
- [KYLIN-1160] - Set default logger appender of log4j for JDBC
- [KYLIN-1161] - Rest API /api/cubes?cubeName= is doing fuzzy match instead of exact match
- [KYLIN-1162] - Enhance HadoopStatusGetter to be compatible with YARN-2605
- [KYLIN-1166] - CubeMigrationCLI should disable and purge the cube in source store after be migrated
- [KYLIN-1168] - Couldn't save cube after doing some modification, get "Update data model is not allowed! Please create a new cube if needed" error
- [KYLIN-1190] - Make memory budget per query configurable

Bug

- [KYLIN-693] - Couldn't change a cube's name after it be created
- [KYLIN-930] - can't see realizations under each project at project list page
- [KYLIN-966] - When user creates a cube, if enter a name which already exists, Kylin will thrown expection on last step
- [KYLIN-1033] - Error when joining two sub-queries
- [KYLIN-1039] - Filter like (A or false) yields wrong result
- [KYLIN-1067] - Support get MapReduce Job status for ResourceManager HA Env
- [KYLIN-1070] - changing case in table name in model desc
- [KYLIN-1093] - Consolidate getCurrentHBaseConfiguration() and newHBaseConfiguration() in HadoopUtil
- [KYLIN-1098] - two "kylin.hbase.region.count.min" in conf/kylin.properties
- [KYLIN-1106] - Can not send email caused by Build Base Cuboid Data step failed
- [KYLIN-1108] - Return Type Empty When Measure-> Count In Cube Design
- [KYLIN-1120] - MapReduce job read local meta issue
- [KYLIN-1121] - ResourceTool download/upload does not work in binary package
- [KYLIN-1140] - Kylin's sample cube "kylin_sales_cube" couldn't be saved.
- [KYLIN-1148] - Edit project's name and cancel edit, project's name still modified
- [KYLIN-1152] - ResourceStore should read content and timestamp in one go
- [KYLIN-1155] - unit test with minicluster doesn't work on 1.x
- [KYLIN-1203] - Cannot save cube after correcting the configuration mistake
- [KYLIN-1205] - hbase RpcClient java.io.IOException: Unexpected closed connection
- [KYLIN-1216] - Can't parse DateFormat like 'YYYYMMDD' correctly in query

Task

- [KYLIN-1170] - Update website and status files to TLP

v1.1.1-incubating - 2015-11-04

Tag: kylin-1.1.1-incubating (https://github.com/apache/kylin/tree/kylin-1.1.1-incubating)

Improvement

- [KYLIN-999] - License check and cleanup for release

v1.1-incubating - 2015-10-25

Tag: kylin-1.1-incubating (https://github.com/apache/kylin/tree/kylin-1.1-incubating)

New Feature

- [KYLIN-222] - Web UI to Display CubeInstance Information
- [KYLIN-906] - cube retention
- [KYLIN-910] - Allow user to enter "retention range" in days on Cube UI

Bug

- [KYLIN-457] - log4j error and dup lines in kylin.log
- [KYLIN-632] - "kylin.sh stop" doesn't check whether KYLIN_HOME was set
- [KYLIN-740] - Slowness with many IN() values
- [KYLIN-747] - bad query performance when IN clause contains a value doesn't exist in the dictionary
- [KYLIN-771] - query cache is not evicted when metadata changes
- [KYLIN-797] - Cuboid cache will cache massive invalid cuboid if existed many cubes which already be deleted
- [KYLIN-847] - "select * from fact" does not work on 0.7 branch
- [KYLIN-913] - Cannot find rowkey column XXX in cube CubeDesc
- [KYLIN-918] - Calcite throws "java.lang.Float cannot be cast to java.lang.Double" error while executing SQL
- [KYLIN-944] - update doc about how to consume kylin API in javascript
- [KYLIN-950] - Web UI "Jobs" tab view the job reduplicated
- [KYLIN-952] - User can trigger a Refresh job on an non-existing cube segment via REST API
- [KYLIN-958] - update cube data model may fail and leave metadata in inconsistent state
- [KYLIN-961] - Can't get cube source record count.
- [KYLIN-967] - Dump running queries on memory shortage
- [KYLIN-968] - CubeSegment.lastBuildJobID is null in new instance but used for rowkey_stats path
- [KYLIN-975] - change kylin.job.hive.database.for.intermediatetable cause job to fail
- [KYLIN-978] - GarbageCollectionStep dropped Hive Intermediate Table but didn't drop external hdfs path
- [KYLIN-982] - package.sh should grep out "Download*" messages when determining version
- [KYLIN-983] - Query sql offset keyword bug
- [KYLIN-985] - Don't suppoprt aggregation AVG while executing SQL
- [KYLIN-1001] - Kylin generates wrong HDFS path in creating intermediate table
- [KYLIN-1004] - Dictionary with '' value cause cube merge to fail
- [KYLIN-1005] - fail to acquire ZookeeperJobLock when hbase.zookeeper.property.clientPort is configured other than 2181
- [KYLIN-1015] - Hive dependency jars appeared twice on job configuration
- [KYLIN-1020] - Although "kylin.query.scan.threshold" is set, it still be restricted to less than 4 million
- [KYLIN-1026] - Error message for git check is not correct in package.sh

Improvement

- [KYLIN-343] - Enable timeout on query
- [KYLIN-367] - automatically backup metadata everyday
- [KYLIN-589] - Cleanup Intermediate hive table after cube build
- [KYLIN-772] - Continue cube job when hive query return empty resultset
- [KYLIN-858] - add snappy compression support
- [KYLIN-882] - check access to kylin.hdfs.working.dir
- [KYLIN-895] - Add "retention_range" attribute for cube instance, and automatically drop the oldest segment when exceeds retention
- [KYLIN-901] - Add tool for cleanup Kylin metadata storage
- [KYLIN-956] - Allow users to configure hbase compression algorithm in kylin.properties
- [KYLIN-957] - Support HBase in a separate cluster
- [KYLIN-965] - Allow user to configure the region split size for cube
- [KYLIN-971] - kylin display timezone on UI
- [KYLIN-987] - Rename 0.7-staging and 0.8 branch
- [KYLIN-998] - Finish the hive intermediate table clean up job in org.apache.kylin.job.hadoop.cube.StorageCleanupJob
- [KYLIN-999] - License check and cleanup for release
- [KYLIN-1013] - Make hbase client configurations like timeout configurable
- [KYLIN-1025] - Save cube change is very slow
- [KYLIN-1034] - Faster bitmap indexes with Roaring bitmaps
- [KYLIN-1035] - Validate [Project] before create Cube on UI
- [KYLIN-1037] - Remove hardcoded "hdp.version" from regression tests
- [KYLIN-1047] - Upgrade to Calcite 1.4
- [KYLIN-1048] - CPU and memory killer in Cuboid.findById()
- [KYLIN-1061] - "kylin.sh start" should check whether kylin has already been running
- [KYLIN-1048] - CPU and memory killer in Cuboid.findById()
- [KYLIN-1061] - "kylin.sh start" should check whether kylin has already been running

v1.0-incubating - 2015-09-06

Tag: kylin-1.0-incubating (https://github.com/apache/kylin/tree/kylin-1.0-incubating)

New Feature

- [KYLIN-591] - Leverage Zeppelin to interactive with Kylin

Bug

- [KYLIN-404] - Can't get cube source record size.
- [KYLIN-626] - JDBC error for float and double values
- [KYLIN-751] - Max on negative double values is not working
- [KYLIN-757] - Cache wasn't flushed in cluster mode
- [KYLIN-780] - Upgrade Calcite to 1.0
- [KYLIN-805] - Drop useless Hive intermediate table and HBase tables in the last step of cube build/merge
- [KYLIN-889] - Support more than one HDFS files of lookup table
- [KYLIN-897] - Update CubeMigrationCLI to copy data model info
- [KYLIN-898] - "CUBOID_CACHE" in Cuboid.java never flushes
- [KYLIN-911] - NEW segments not DELETED when cancel BuildAndMerge Job
- [KYLIN-912] - $KYLIN_HOME/tomcat/temp folder takes much disk space after long run
- [KYLIN-914] - Scripts shebang should use /bin/bash
- [KYLIN-915] - appendDBName in CubeMetadataUpgrade will return null
- [KYLIN-921] - Dimension with all nulls cause BuildDimensionDictionary failed due to FileNotFoundException
- [KYLIN-923] - FetcherRunner will never run again if encountered exception during running
- [KYLIN-929] - can not sort cubes by [Source Records] at cubes list page
- [KYLIN-934] - Negative number in SUM result and Kylin results not matching exactly Hive results
- [KYLIN-935] - always loading when try to view the log of the sub-step of cube build job
- [KYLIN-936] - can not see job step log
- [KYLIN-940] - NPE when close the null resouce
- [KYLIN-945] - Kylin JDBC - Get Connection from DataSource results in NullPointerException
- [KYLIN-946] - [UI] refresh page show no results when Project selected as [–Select All–]
- [KYLIN-949] - Query cache doesn't work properly for prepareStatement queries

Improvement

- [KYLIN-568] - job support stop/suspend function so that users can manually resume a job
- [KYLIN-717] - optimize OLAPEnumerator.convertCurrentRow()
- [KYLIN-792] - kylin performance insight [dashboard]
- [KYLIN-838] - improve performance of job query
- [KYLIN-842] - Add version and commit id into binary package
- [KYLIN-844] - add backdoor toggles to control query behavior
- [KYLIN-857] - backport coprocessor improvement in 0.8 to 0.7
- [KYLIN-866] - Confirm with user when he selects empty segments to merge
- [KYLIN-867] - Hybrid model for multiple realizations/cubes
- [KYLIN-880] - Kylin should change the default folder from /tmp to user configurable destination
- [KYLIN-881] - Upgrade Calcite to 1.3.0
- [KYLIN-883] - Using configurable option for Hive intermediate tables created by Kylin job
- [KYLIN-893] - Remove the dependency on quartz and metrics
- [KYLIN-922] - Enforce same code style for both intellij and eclipse user
- [KYLIN-926] - Make sure Kylin leaves no garbage files in local OS and HDFS/HBASE
- [KYLIN-933] - friendly UI to use data model
- [KYLIN-938] - add friendly tip to page when rest request failed

Task

- [KYLIN-884] - Restructure docs and website
- [KYLIN-907] - Improve Kylin community development experience
- [KYLIN-954] - Release v1.0 (formerly v0.7.3)
- [KYLIN-863] - create empty segment when there is no data in one single streaming batch
- [KYLIN-908] - Help community developer to setup develop/debug environment

- [KYLIN-931] - Port KYLIN-921 to 0.8 branch

v0.7.2-incubating - 2015-07-21

Tag: kylin-0.7.2-incubating (https://github.com/apache/kylin/tree/kylin-0.7.2-incubating)

Main Changes:
Critical bug fixes after v0.7.1 release, please go with this version directly for new case and upgrade to this version for existing deployment.

Bug

- [KYLIN-514] - Error message is not helpful to user when doing something in Jason Editor window
- [KYLIN-598] - Kylin detecting hive table delim failure
- [KYLIN-660] - Make configurable of dictionary cardinality cap
- [KYLIN-765] - When a cube job is failed, still be possible to submit a new job
- [KYLIN-814] - Duplicate columns error for subqueries on fact table
- [KYLIN-819] - Fix necessary ColumnMetaData order for Calcite (Optic)
- [KYLIN-824] - Cube Build fails if lookup table doesn't have any files under HDFS location
- [KYLIN-829] - Cube "Actions" shows "NA"; but after expand the "access" tab, the button shows up
- [KYLIN-830] - Cube merge failed after migrating from v0.6 to v0.7
- [KYLIN-831] - Kylin report "Column 'ABC' not found in table 'TABLE' while executing SQL", when that column is FK but not define as a dimension
- [KYLIN-840] - HBase table compress not enabled even LZO is installed
- [KYLIN-848] - Couldn't resume or discard a cube job
- [KYLIN-849] - Couldn't query metrics on lookup table PK
- [KYLIN-865] - Cube has been built but couldn't query; In log it said "Realization 'CUBE.CUBE_NAME' defined under project PROJECT_NAME is not found
- [KYLIN-873] - cancel button does not work when [resume][discard] job
- [KYLIN-888] - "Jobs" page only shows 15 job at max, the "Load more" button was disappeared

Improvement

- [KYLIN-159] - Metadata migrate tool
- [KYLIN-199] - Validation Rule: Unique value of Lookup table's key columns
- [KYLIN-207] - Support SQL pagination
- [KYLIN-209] - Merge tail small MR jobs into one
- [KYLIN-210] - Split heavy MR job to more small jobs
- [KYLIN-221] - Convert cleanup and GC to job
- [KYLIN-284] - add log for all Rest API Request
- [KYLIN-488] - Increase HDFS block size 1GB
- [KYLIN-600] - measure return type update
- [KYLIN-611] - Allow Implicit Joins
- [KYLIN-623] - update Kylin UI Style to latest AdminLTE
- [KYLIN-727] - Cube build in BuildCubeWithEngine does not cover incremental build/cube merge
- [KYLIN-752] - Improved IN clause performance
- [KYLIN-773] - performance is slow list jobs
- [KYLIN-839] - Optimize Snapshot table memory usage

New Feature

- [KYLIN-211] - Bitmap Inverted Index
- [KYLIN-285] - Enhance alert program for whole system
- [KYLIN-467] - Validataion Rule: Check duplicate rows in lookup table
- [KYLIN-471] - Support "Copy" on grid result

Task

- [KYLIN-7] - Enable maven checkstyle plugin
- [KYLIN-885] - Release v0.7.2
- [KYLIN-812] - Upgrade to Calcite 0.9.2

v0.7.1-incubating (First Apache Release) - 2015-06-10

Tag: kylin-0.7.1-incubating (https://github.com/apache/kylin/tree/kylin-0.7.1-incubating)

Apache Kylin v0.7.1-incubating has rolled out on June 10, 2015. This is also the first Apache release after join incubating.

Main Changes:

- Package renamed from com.kylinolap to org.apache.kylin
- Code cleaned up to apply Apache License policy
- Easy install and setup with bunch of scripts and automation
- Job engine refactor to be generic job manager for all jobs, and improved efficiency
- Support Hive database other than 'default'
- JDBC driver avaliable for client to interactive with Kylin server
- Binary pacakge avaliable download

New Feature

- [KYLIN-327] - Binary distribution
- [KYLIN-368] - Move MailService to Common module
- [KYLIN-540] - Data model upgrade for legacy cube descs
- [KYLIN-576] - Refactor expansion rate expression

Task

- [KYLIN-361] - Rename package name with Apache Kylin
- [KYLIN-531] - Rename package name to org.apache.kylin
- [KYLIN-533] - Job Engine Refactoring
- [KYLIN-585] - Simplify deployment
- [KYLIN-586] - Add Apache License header in each source file
- [KYLIN-587] - Remove hard copy of javascript libraries
- [KYLIN-624] - Add dimension and metric info into DataModel
- [KYLIN-650] - Move all document from github wiki to code repository (using md file)
- [KYLIN-669] - Release v0.7.1 as first apache release
- [KYLIN-670] - Update pom with "incubating" in version number
- [KYLIN-737] - Generate and sign release package for review and vote
- [KYLIN-795] - Release after success vote

Bug

- [KYLIN-132] - Job framework
- [KYLIN-194] - Dict & ColumnValueContainer does not support number comparison, they do string comparison right now
- [KYLIN-220] - Enable swap column of Rowkeys in Cube Designer
- [KYLIN-230] - Error when create HTable
- [KYLIN-255] - Error when a aggregated function appear twice in select clause
- [KYLIN-383] - Sample Hive EDW database name should be replaced by "default" in the sample
- [KYLIN-399] - refreshed segment not correctly published to cube
- [KYLIN-412] - No exception or message when sync up table which can't access
- [KYLIN-421] - Hive table metadata issue
- [KYLIN-436] - Can't sync Hive table metadata from other database rather than "default"
- [KYLIN-508] - Too high cardinality is not suitable for dictionary!
- [KYLIN-509] - Order by on fact table not works correctly
- [KYLIN-517] - Always delete the last one of Add Lookup page buttom even if deleting the first join condition
- [KYLIN-524] - Exception will throw out if dimension is created on a lookup table, then deleting the lookup table.
- [KYLIN-547] - Create cube failed if column dictionary sets false and column length value greater than 0
- [KYLIN-556] - error tip enhance when cube detail return empty
- [KYLIN-570] - Need not to call API before sending login request
- [KYLIN-571] - Dimensions lost when creating cube though Joson Editor
- [KYLIN-572] - HTable size is wrong
- [KYLIN-581] - unable to build cube
- [KYLIN-583] - Dependency of Hive conf/jar in Ⅱ branch will affect auto deploy

- [KYLIN-588] - Error when run package.sh
- [KYLIN-593] - angular.min.js.map and angular-resource.min.js.map are missing in kylin.war
- [KYLIN-594] - Making changes in build and packaging with respect to apache release process
- [KYLIN-595] - Kylin JDBC driver should not assume Kylin server listen on either 80 or 443
- [KYLIN-605] - Issue when install Kylin on a CLI which does not have yarn Resource Manager
- [KYLIN-614] - find hive dependency shell fine is unable to set the hive dependency correctly
- [KYLIN-615] - Unable add measures in Kylin web UI
- [KYLIN-619] - Cube build fails with hive+tez
- [KYLIN-620] - Wrong duration number
- [KYLIN-621] - SecurityException when running MR job
- [KYLIN-627] - Hive tables' partition column was not sync into Kylin
- [KYLIN-628] - Couldn't build a new created cube
- [KYLIN-629] - Kylin failed to run mapreduce job if there is no mapreduce.application.classpath in mapred-site.xml
- [KYLIN-630] - ArrayIndexOutOfBoundsException when merge cube segments
- [KYLIN-638] - kylin.sh stop not working
- [KYLIN-639] - Get "Table 'xxxx' not found while executing SQL" error after a cube be successfully built
- [KYLIN-640] - sum of float not working
- [KYLIN-642] - Couldn't refresh cube segment
- [KYLIN-643] - JDBC couldn't connect to Kylin: "java.sql.SQLException: Authentication Failed"
- [KYLIN-644] - join table as null error when build the cube
- [KYLIN-652] - Lookup table alias will be set to null
- [KYLIN-657] - JDBC Driver not register into DriverManager
- [KYLIN-658] - java.lang.IllegalArgumentException: Cannot find rowkey column XXX in cube CubeDesc
- [KYLIN-659] - Couldn't adjust the rowkey sequence when create cube
- [KYLIN-666] - Select float type column got class cast exception
- [KYLIN-681] - Failed to build dictionary if the rowkey's dictionary property is "date(yyyy-mm-dd)"
- [KYLIN-682] - Got "No aggregator for func 'MIN' and return type 'decimal(19,4)'" error when build cube
- [KYLIN-684] - Remove holistic distinct count and multiple column distinct count from sample cube
- [KYLIN-691] - update tomcat download address in download-tomcat.sh
- [KYLIN-696] - Dictionary couldn't recognize a value and throw IllegalArgumentException: "Not a valid value"
- [KYLIN-703] - UT failed due to unknown host issue
- [KYLIN-711] - UT failure in REST module
- [KYLIN-739] - Dimension as metrics does not work with PK-FK derived column
- [KYLIN-761] - Tables are not shown in the "Query" tab, and couldn't run SQL query after cube be built

Improvement

- [KYLIN-168] - Installation fails if multiple ZK
- [KYLIN-182] - Validation Rule: columns used in Join condition should have same datatype
- [KYLIN-204] - Kylin web not works properly in IE
- [KYLIN-217] - Enhance coprocessor with endpoints
- [KYLIN-251] - job engine refactoring
- [KYLIN-261] - derived column validate when create cube
- [KYLIN-317] - note: grunt.json need to be configured when add new javascript or css file
- [KYLIN-324] - Refactor metadata to support InvertedIndex
- [KYLIN-407] - Validation: There's should no Hive table column using "binary" data type
- [KYLIN-445] - Rename cube_desc/cube folder
- [KYLIN-452] - Automatically create local cluster for running tests
- [KYLIN-498] - Merge metadata tables
- [KYLIN-532] - Refactor data model in kylin front end
- [KYLIN-539] - use hbase command to launch tomcat
- [KYLIN-542] - add project property feature for cube
- [KYLIN-553] - From cube instance, couldn't easily find the project instance that it belongs to
- [KYLIN-563] - Wrap kylin start and stop with a script
- [KYLIN-567] - More flexible validation of new segments
- [KYLIN-569] - Support increment+merge job
- [KYLIN-578] - add more generic configuration for ssh
- [KYLIN-601] - Extract content from kylin.tgz to "kylin" folder

- [KYLIN-616] - Validation Rule: partition date column should be in dimension columns
- [KYLIN-634] - Script to import sample data and cube metadata
- [KYLIN-636] - wiki/On-Hadoop-CLI-installation is not up to date
- [KYLIN-637] - add start&end date for hbase info in cubeDesigner
- [KYLIN-714] - Add Apache RAT to pom.xml
- [KYLIN-753] - Make the dependency on hbase-common to "provided"
- [KYLIN-758] - Updating port forwarding issue Hadoop Installation on Hortonworks Sandbox.
- [KYLIN-779] - [UI] jump to cube list after create cube
- [KYLIN-796] - Add REST API to trigger storage cleanup/GC

Wish

- [KYLIN-608] - Distinct count for ii storage

(http://www.apache.org)
